Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity

Springer Nature *Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats, providing a wide variety of benefits to human beings. Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures, including pollution, contamination, invasive species, overfishing and climate change. Such pressures threaten the sustainability of these ecosystems, their provision of ecosystem services and ultimately human well-being. Ecosystem-based management (EBM) is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection, and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision-making. This open access book introduces the essential concepts and principles required to implement ecosystem-based management, detailing tools and techniques, and describing the application of these concepts and tools to a broad range of aquatic ecosystems, from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta.*

The Zero Waste Solution

Untrashing the Planet One Community at a Time

Chelsea Green Publishing Waste is something we all make every day but often pay little attention to. That's changing, and model programs around the globe show the many different ways a community can strive for, and achieve, zero-waste status. Scientist-turned-activist Paul Connett, a leading international figure in decades-long battles to fight pollution, has championed efforts to curtail overconsumption and keep industrial toxins out of our air and drinking water and bodies. But he's best known around the world for leading efforts to help communities deal with their waste in sustainable ways—in other words, to eliminate and reuse waste rather than burn it or stow it away in landfills. In *The Zero Waste Solution*, Connett profiles the most successful zero-waste initiatives around the world, showing activists, planners, and entrepreneurs how to re-envision their community's waste-handling process—by consuming less, turning organic waste into compost, recycling, reusing other waste, demanding nonwasteful product design, and creating jobs and bringing community members together in the process. The book also exposes the greenwashing behind renewed efforts to promote waste incinerators as safe, nontoxic energy suppliers, and gives detailed information on how communities can battle incineration projects that, even at their best, emit dangerous particles into the atmosphere, many of which remain unregulated or poorly regulated. An important toolkit for anyone interested in creating sustainable communities, generating secure local jobs, and keeping toxic alternatives at bay.

Opportunities for Improving Programs and Services for Children with Disabilities

National Academies Press Although the general public in the United States assumes children to be generally healthy and thriving, a substantial and growing number of children have at least one chronic health condition. Many of these conditions are associated with disabilities and interfere regularly with children's usual activities, such as play or leisure activities, attending school, and engaging in family or community activities. In their most severe forms, such disorders are serious lifelong threats to children's social, emotional well-being and quality of life, and anticipated adult outcomes such as for employment or independent living. However, pinpointing the prevalence of disability among children in the U.S. is difficult, as conceptual frameworks and definitions of disability vary among federal programs that provide services to this population and national surveys, the two primary sources for prevalence data. *Opportunities for Improving Programs and Services for Children with Disabilities* provides a comprehensive analysis of health outcomes for school-aged children with disabilities. This report reviews and assesses programs, services, and supports available to these children and their families. It also describes overarching program, service, and treatment goals; examines outreach efforts and utilization rates; identifies what outcomes are measured and how they are reported; and describes what is known about the effectiveness of these programs and services.
