### High-Level Subject Access Tools and Techniques in Internet Cataloging

CRC Press Is your library's portal as efficient as it could be? High-Level Subject Access Tools and Techniques explores the potential and early development of high-level subject access. It examines Web tools and traditionally maintained library structures that facilitate the automated relation of resources to high-level subject categories based on the descriptive metadata that already exists in traditional library records. It includes a research study of high-level subject browse structures, as well as hands-on reports of actual projects and development activities and an examination of the environment in which demand for high-level subject access arises. From the editor: "As the World Wide Web and graphic user interfaces developed in the 90s, libraries began to build gateways for their online resources. These gateways allowed library users to employ the browse, point, and click approach to resource discovery that they had come to expect from online tools. Most of these interfaces amounted to little more than hand-constructed lists of links. Today, many libraries offer access to users through a set list of broad topics, sometimes called a high-level browse display. Methods for populating these subject categories remain crude and their maintenance requires considerable resources. As a result, libraries have begun to look at ways of applying traditional techniques associated with cataloging to these new interfaces. Several goals are involved in these developments. Many hope to reuse data from library catalogs and thus limit maintenance burdens. Others seek to apply a more standard set of tools and principles to the construction of portals to allow greater cooperation among institutions that want to interoperate with each other." This pathbreaking book examines vital issues in high-level subject access, including: subject trees and their relationship to the structure inherent in Dewey Classification emerging patterns in the development of browsing services, including a hierarchy of subjects that is not based in classification, a map that relates data from catalog records to the subject hierarchy, and tools for extracting data from a catalog and storing it in a separate database to produce a more flexible display task-based (as opposed to materials-based) subject lists the social issues that are associated with choosing categories—based on the nature and activity of an institution's library users the political issues involved in selecting disciplines or topics for a browsing service And presents fascinating case studies of: Columbia University's efforts to build an automatically generated browsable display based on Library of Congress Classification as it occurs in catalog records the High-Level Thesaurus Project (HILT), in which a group of libraries, archives, and museums attempted to find a common method for high-level subject access via portal

### The Fourth Industrial Revolution

Penguin UK The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

### Empowerment Series: Research Methods for Social Work

Cengage Learning Widely considered the best text for the course, RESEARCH METHODS FOR SOCIAL WORK strikes an optimal balance of quantitative and qualitative research techniques -- illustrating how the two methods complement one another and how they can be integrated in mixed-methods studies. Rubin and Babbie's classic bestseller is acclaimed for its depth and breadth of coverage as well as for the authors' clear and often humorous writing style. A rigorous and comprehensive presentation, combined with a reader-friendly approach, helps students overcome the fear factor often associated with this course. Examples from real-world settings help students see the connections between research and social work practice. The Ninth Edition continues to incorporate coverage of evidence-based practice, and aligns with other accreditation requirements based on the EPAS guidelines. It can be used across undergraduate, graduate, and doctorate levels of study. ### Successful Enquiry Answering Every Time, 7th edition

### Thinking your way from problem to solution

Facet Publishing Successful Enquiry Answering Every Time is designed to guide information professionals through all the stages of research, from finding out what the enquirer really wants, to providing a polished, value-added answer. When people want to satisfy their immediate curiosity they're much more likely to use a search engine on their mobile device than ask their local library. But while the days of personal intervention in this kind of enquiry are inevitably numbered, the professional skills that underpin them are not. This book uses technology as the enabler of the thought processes that

information professionals need to engage in when answering enquiries, and makes the case that new technology, far from making them irrelevant, raises the skill stakes for all. Now in its 7th edition, this book is fully updated to cover new skills, such as: employing critical thinking to manipulate, categorise and prioritise raw search results using strategic reading and abstracting techniques to identify and summarise the essential information the enquirer needs from the retrieved documents drawing on established story-telling practice to present research results effectively – whether orally or in writing working to the POWER model: plan, organise, write, edit, review. This book is ideal for anyone who has to answer enquiries from users in any information role; those working in contact centres who are dealing with information enquiries, processing transactions or trouble-shooting technical issues; and information professionals working on enquiry desks in large or small academic, public, school or special libraries.

## Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems

### Second International Conference, CPAIOR 2005, Prague, Czech Republic, May 31 -- June 1, 2005

Springer The 2nd International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems (CPAIOR2005) was held in Prague, Czech Republic, during May 31–June 1, 2005. The conference is intended primarily as a forum to focus on the integration and hybridization of the approaches of constraint programming (CP), artificial intelligence (AI), and operations research (OR) technologies for solving large-scale and complex real-life optimization problems. Therefore, CPAIOR is never far from industrial applications. The high number of submissions received this year, almost 100 papers, in witness to the interest of the research community in this conference. From these submissions, we chose 26 to be published in full in the proceedings. This volume includes summaries of the invited talks of CPAIOR: one from industry, one from the embedded system research community, and one from the operations research community. The invited speakers were: Filippo Focacci from ILOGS.A., France, one of the leading companies in the field; Paul Pop, professor in the Embedded Systems Lab in the Computer and Information Science Department, Linköping University; and Paul Williams, full professor of Operations Research at the London School of Economics. The day before CPAIOR, a Master Class was organized by Gilles Pesant, where leading researchers gave introductory and overview talks in the area of metaheuristics and constraint programming. The Master Class was intended for PhD students, researchers, and practitioners. We are very grateful to Gilles who brought this excellent program together. For conference publicity we warmly thank Willem Jan van Hoeve and Petr Vím who did a great job with the high number of submissions received.

## Internet Searches for Vetting, Investigations, and Open-Source Intelligence

CRC Press In the information age, it is critical that we understand the implications and exposure of the activities and data documented on the Internet. Improved efficiencies and the added capabilities of instant communication, high-speed connectivity to browsers, search engines, websites, databases, indexing, searching and analytical applications have made information technology (IT) and the Internet a vital issued for public and private enterprises. The downside is that this increased level of complexity and vulnerability presents a daunting challenge for enterprise and personal security. Internet Searches for Vetting, Investigations, and Open-Source Intelligence provides an understanding of the implications of the activities and data documented by individuals on the Internet. It delineates a much-needed framework for the responsible collection and use of the Internet for intelligence, investigation, vetting, and open-source information. This book makes a compelling case for action as well as reviews relevant laws, regulations, and rulings as they pertain to Internet crimes, misbehaviors, and individuals' privacy. Exploring technologies such as social media and aggregate information services, the author outlines the techniques and skills that can be used to leverage the capabilities of networked systems on the Internet and find critically important data to complete an up-to-date picture of people, employees, entities, and their activities. Outlining appropriate adoption of legal, policy, and procedural principles—and emphasizing the careful and appropriate use of Internet searching within the law—the book includes coverage of cases, privacy issues, and solutions for common problems encountered in Internet searching practice and information usage, from internal and external threats. The book is a valuable resource on how to utilize open-source, online sources to gather important information and screen and vet employees, prospective employees, corporate partners, and vendors.
