Dialogues of Love

University of Toronto Press First published in Rome in 1535, Leone Ebreo's *Dialogues of Love* is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguel de Cervantes, and Baruch Spinoza. Leone's *Dialogues* consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'On the Origin of Love' - that take place over a period of three subsequent days. They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover and teacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

Radar Instruction Manual

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

True and False Reform in the Church

Liturgical Press Archbishop Angelo Roncalli (later Pope John XXIII) read *True and False Reform* during his years as papal nuncio in France and asked, "A reform of the church 'is such a thing really possible?'" A decade later as pope, he opened the Second Vatican

*Council by describing its goals in terms that reflected Congar's description of authentic reform: reform that penetrates to the heart of doctrine as a message of salvation for the whole of humanity, that retrieves the meaning of prophecy in a living church, and that is deeply rooted in history rather than superficially related to the apostolic tradition. Pope John called the council not to reform heresy or to denounce errors but to update the church's capacity to explain itself to the world and to revitalize ecclesial life in all its unique local manifestations. Congar's masterpiece fills in the blanks of what we have been missing in our reception of the council and its call to "true reform." Yves Congar, OP, a French Dominican who died in 1995, was the most important ecclesialist in modern times. His writings and his active participation in Vatican II had an immense influence upon the council documents. With a few other contemporaries, Congar pioneered a new style of theological research and writing that linked the great tradition of Scripture and the Fathers to contemporary pastoral questions with lucidity and passion. His key concerns were the unity of the church, lay apostolic life, and a revival of the church's theology of the Holy Spirit. He was named a cardinal by Pope John Paul II in recognition of his profound contributions to the Second Vatican Council. Pal Philibert, OP, has taught pastoral theology in the United States and abroad. He is a Dominican friar of the Southern Province. His translation of a collection of Congar's essays on the liturgy has recently been published by Liturgical Press under the title *At the Heart of Christian Worship*. His book *The Priesthood of the Faithful: Key to a living Church* (Liturgical Press, 2005) reflects the ecclesiology of Yves Congar and his vision of the apostolic life of the faithful. "*
