Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Introduction to Applied Linear Algebra

Vectors, Matrices, and Least Squares

Cambridge University Press A groundbreaking introduction to vectors, matrices, and least squares for engineering applications, offering a wealth of practical examples.

Higher Education Opportunity Act

OECD Reviews of Evaluation and Assessment in Education Synergies for Better Learning An International Perspective on Evaluation and Assessment

An International Perspective on Evaluation and Assessment

OECD Publishing This report provides an international comparative analysis and policy advice to countries on how evaluation and assessment arrangements can be embedded within a consistent framework to improve the quality, equity and efficiency of school education.

Smartups

Lessons from Rob Ryan's Entrepreneur America Boot Camp for Start-Ups

Cornell University Press Building successful start-ups was never quite as easy as it seemed, and the changing economic climate has raised the stakes, reduced the margin of error. New entrepreneurs can't stumble into wealth on the power of half-formed ideas, or turn dreams into reality without doing a lot of homework. It's time to get smart. This book teaches would-be entrepreneurs the skills they need to get through the venture capital process with companies that will survive to grow and succeed. Rob Ryan, a pioneer in the high-tech industry, founded Ascend Communications in 1989, and throughout the nineties provided firms with the infrastructure they needed to keep up with the rapid growth of the Internet. At the beginning of 1999, Ascend was sold to Lucent for \$25 billion. Since retiring from Ascend and starting Entrepreneur America, Ryan has helped launch a string of successful companies, including Virtmed, RightNow, and Virtual Ink. All provide electronic solutions to real-world problems, meet existing—rather than manufactured—needs, and save their customers time and money. In Smartups, Ryan focuses on methods he's developed over the years for building a sustainable business that makes money. He emphasizes the importance of testing ideas on customers and making sure that a product offers something new and important. Recognizing a team's key competencies is crucial, Ryan says. He also finds it necessary to take certain steps at the correct stages of a company's inception. Smartups will show you how to turn your idea into a real product, take it to investors, and get your start-up started right.

Innovation and Interdisciplinary Solutions for Underserved Areas

First International Conference, InterSol 2017 and Sixth Colloque National sur la Recherche en Informatique et ses Applications, CNRIA 2017, Dakar, Senegal, April 11–12, 2017, Proceedings

Springer This book constitutes the refereed post-conference proceedings of the First International Conference on Innovation and Interdisciplinary Solutions for Underserved Areas, InterSol 2017, and the 6th Colloque National sur la Recherche en Informatique et ses Applications (CNRIA), held in Dakar, Senegal, in April 2017. The 15 papers presented at InterSol were selected from 76 submissions and are grouped thematically in science, energy and environment, education, innovation, and healthcare. The proceedings also contain 13 papers from the co-located 6th CNRIA (Colloque National sur la

Recherche en Informatique et ses Applications) focusing on network architecture and security, software engineering, data management, and signal processing.

The Inside Story

A Guide to Indoor Air Quality

The Patriotism of Despair

Nation, War, and Loss in Russia

Cornell University Press The sudden dissolution of the Soviet Union altered the routines, norms, celebrations, and shared understandings that had shaped the lives of Russians for generations. It also meant an end to the state-sponsored, nonmonetary support that most residents had lived with all their lives. How did Russians make sense of these historic transformations? Serguei Alex Oushakine offers a compelling look at postsocialist life in Russia. In Barnaul, a major industrial city in southwestern Siberia that has lost 25 percent of its population since 1991, many Russians are finding that what binds them together is loss and despair. The Patriotism of Despair examines the aftermath of the collapse of the Soviet Union, graphically described in spray paint by a graffiti artist in Barnaul: "We have no Motherland." Once socialism disappeared as a way of understanding the world, what replaced it in people's minds? Once socialism stopped orienting politics and economics, how did capitalism insinuate itself into routine practices? Serguei Alex. Oushakine offers a compelling look at postsocialist life in noncosmopolitan Russia. He introduces readers to the "neocoms": people who mourn the loss of the Soviet economy and the remonetization of transactions that had not involved the exchange of cash during the Soviet era. Moving from economics into military conflict and personal loss, Oushakine also describes the ways in which veterans of the Chechen war and mothers of soldiers who died there have connected their immediate experiences with the country's historical disruptions. The country, the nation, and traumatized individuals, Oushakine finds, are united by their vocabulary of shared pain.

The Thirty Years War

Europe's Tragedy

Belknap Press Argues that religion was not the catalyst to the Thirty Years War, but one element in a mix of political, social, and dynastic forces that fed the conflict that ultimately transformed the map of the modern world.

Victims of Crime Survey

Natural Language Processing with SAS

Special Collection

Natural Language Processing (NLP) is a branch of artificial intelligence that helps computers understand, interpret, and emulate written or spoken human language. NLP draws from many disciplines including human-generated linguistic rules, machine learning, and deep learning to fill the gap between human communication and machine understanding. The papers included in this special collection demonstrate how NLP can be used to scale the human act of reading, organizing, and quantifying text data.

Memorandums by James Martin

An Astonishing Escape from Early New South Wales

UCL Press Among the vast body of manuscripts composed and collected by the philosopher and reformer Jeremy Bentham (1748-1832), held by UCL Library's Special Collections, is the earliest Australian convict narrative, Memorandums by James Martin. This document also happens to be the only extant first-hand account of the most well-known, and most mythologized, escape from Australia by transported convicts. On the night of 28 March 1791, James Martin, William and Mary Bryant and their two infant children, and six other male convicts, stole the colony's fishing boat and sailed out of Sydney Harbour. Within ten weeks they had reached Kupang in West Timor, having, in an amazing feat of endurance, travelled over 3,000 miles (c. 5,000) kilometres in an open boat. There they passed themselves off as the survivors of a shipwreck, a ruse which—initially, at least—fooled their Dutch hosts. This new edition of the Memorandums includes full colour reproductions of the original manuscripts, making available for the first time this hugely important document, alongside a transcript with commentary describing the events and key characters. The book also features a scholarly introduction which examines their escape and early convict absconding in New South Wales more generally, and, drawing on primary records, presents new research which sheds light on the fate of the escapees after they reached Kupang. The introduction also assesses the voluminous literature on this most famous escape, and critically examines the myths and fictions created around it and the escapees, myths which have gone unchallenged for far too long. Finally, the introduction briefly discusses Jeremy Bentham's views on convict transportation and their enduring impact.

Management Information Systems

Managing the Digital Firm

Pearson Educación Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Knowledge Graphs and Big Data Processing

Springer Nature This open access book is part of the LAMBDA Project (Learning, Applying, Multiplying Big Data Analytics), funded by the European Union, GA No. 809965. Data Analytics involves applying algorithmic processes to derive insights. Nowadays it is used in many industries to allow organizations and companies to make better decisions as well as to verify or disprove existing theories or models. The term data analytics is often used interchangeably with intelligence, statistics, reasoning, data mining, knowledge discovery, and others. The goal of this book is to introduce some of the definitions, methods, tools, frameworks, and solutions for big data processing, starting from the process of information extraction and knowledge representation, via knowledge processing and analytics to visualization, sense-making, and practical applications. Each chapter in this book addresses some pertinent aspect of the data processing chain, with a specific focus on understanding Enterprise Knowledge Graphs, Semantic Big Data Architectures, and Smart Data Analytics solutions. This book is addressed to graduate students from technical disciplines, to professional audiences following continuous education short courses, and to researchers from diverse areas following self-study courses. Basic skills in computer science, mathematics, and statistics are required.

Free Culture

Lulu Press, Inc Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

Hierarchy in International Relations

Cornell University Press International relations are generally understood as a realm of anarchy in which countries lack any superior authority and interact within a Hobbesian state of nature. In Hierarchy in International Relations, David A. Lake challenges this traditional view, demonstrating that states exercise authority over one another in international hierarchies that vary historically but are still pervasive today. Revisiting the concepts of authority and sovereignty, Lake offers a novel view of international relations in which states form social contracts that bind both dominant and subordinate members. The resulting hierarchies have significant effects on the foreign policies of states as well as patterns of international conflict and cooperation. Focusing largely on U.S.-led hierarchies in the contemporary world, Lake provides a compelling account of the origins, functions, and limits of political order in the modern international system. The book is a model of clarity in theory, research design, and the use of evidence. Motivated by concerns about the declining international legitimacy of the United States following the Iraq War, Hierarchy in International Relations offers a powerful analytic perspective that has important implications for understanding America's position in the world in the years ahead.

Proceedings of International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications

ICMISC 2020

Springer Nature This book gathers selected research papers presented at the International Conference on Recent Trends in Machine Learning, IOT, Smart Cities & Applications (ICMISC 2020), held on 29-30 March 2020 at CMR Institute of Technology, Hyderabad, Telangana, India. Discussing current trends in machine learning, Internet of things, and smart cities applications, with a focus on multi-disciplinary research in the area of artificial intelligence and cyber-physical systems, this book is a valuable resource for scientists, research scholars and PG students wanting formulate their research ideas and find the future directions in these areas. Further, it serves as a reference work anyone wishing to understand the latest technologies used by practicing engineers around the globe.

The Quartermaster Corps

Organization, Supply, and Services

Practical Environmental Analysis

Royal Society of Chemistry New techniques, improved understanding and changes in regulations relating to environmental analysis means that students, technicians and lecturers alike need an up-to-date guide to practical environmental analysis. This unique book provides detailed instructions for practical experiments in environmental analysis. The comprehensive coverage includes the chemical analysis of important pollutants in air, water, soil and plant tissue, and the experiments generally require only basic laboratory equipment and instrumentation. The content is supported by theoretical material explaining, amongst other concepts, the principles behind each method and the importance of various pollutants. Also included are suggestions for projects and worked examples. Appendices cover environmental standards, practical safety and laboratory practice. Building on the foundations laid by the highly acclaimed first edition, this new edition has been revised and updated to include information on new monitoring techniques, the Air Quality Index, internet resources and professional ethics. Like its predecessor, this informative text is certain to be valued as an indispensable guide to practical environmental analysis by students on a variety of science courses and their lecturers. Reviews of the first edition: "I strongly urge academics in chemistry, biology, botany, soil science, geography and environmental science departments to give [this book] serious consideration as a course text." Malcolm Cresser, Environment Department, University of York, UK "Destined to become a course text for many university courses ... a high quality, informative introductory text ... there should be multiple copies on most university's library shelves." Crossing the Rubicon

The Decline of the American Empire at the End of the Age of Oil

New Society Publisher The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. Crossing the Rubicon examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. Crossing the Rubicon is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

Towards Sustainable Preservation and Accessibility of Documentary Heritage

UNESCO Publishing

Conversational Latin for Oral Proficiency

Phrase Book and Dictionary, Classical and Neo-Latin

Bolchazy-Carducci Publishers "Presents ancient and neo-Latin language phrases and conversations on a variety of topics. Includes pronunciation guide, bibliography, and English to Latin vocabulary. Expanded and enlarged from the 3rd edition (2003)"--Provided by publisher.

Noise, Water, Meat

A History of Sound in the Arts

MIT Press An examination of the role of sound in twentieth-century arts. This interdisciplinary history and theory of sound in the arts reads the twentieth century by listening to it—to the emphatic and exceptional sounds of modernism and those on the cusp of postmodernism, recorded sound, noise, silence, the fluid sounds of immersion and dripping, and the meat voices of viruses, screams, and bestial cries. Focusing on Europe in the first half of the century and the United States in the postwar years, Douglas Kahn explores aural activities in literature, music, visual arts, theater, and film. Placing aurality at the center of the history of the arts, he revisits key artistic questions, listening to the sounds that drown out the politics and poetics that generated them. Artists discussed include Antonin Artaud, George Brecht, William Burroughs, John Cage, Sergei Eisenstein, Fluxus, Allan Kaprow, Michael McClure, Yoko Ono, Jackson Pollock, Luigi Russolo, and Dziga Vertov.

Toxic Loopholes

Failures and Future Prospects for Environmental Law

Cambridge University Press The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even death. *Toxic Loopholes* investigates these laws, and the agency charged with their enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.

Essential Words for the GRE

Barrons Educational Series An extensive working vocabulary is a prerequisite for test-taking success on the GRE Graduate Record Exam. This revised and updated test preparation guide presents 800 college-graduate-level words with definitions that frequently appear on the exam, while also familiarizing test takers with how the words are generally used in various contexts. Additional features include a pretest that serves as a diagnostic, a lengthy word list with extensive sentence-completion exercises, and a chapter that discusses and analyzes essential word roots. The book concludes with a detailed posttest. Answers are provided for all exercises and for all questions in the posttest.

Sustainable Vernacular Architecture

How the Past Can Enrich the Future

Springer This book discusses applying vernacular strategies to modern architectural design to adhere to basic green principles of energy efficiency and materials utilization. Written from an international perspective, chapters present the perspectives and experiences of architects and engineers from across the globe. Historically successful approaches are integrated with modern design concepts to create novel, sustainable, and resource conscious solutions. The scope of topics covered include natural ventilation, cooling and heating, daylight and shading devices, and green micro-climate and functional facades, making this a useful reference for a wide range of researchers and workers in the built environment. Covers the most up-to-date research developments, best practices, and innovations from countries all over the globe; Presents the latest research in vernacular architecture and sustainable building; Contains case studies and examples to enhance practical application of the technologies presented.

Conserving Outdoor Painted Sculpture

Proceedings from the Interim Meeting of the Modern Materials and Contemporary Art Working Group of ICOM-CC

Proceedings from the interim meeting of the Modern Materials and Contemporary Art Working Group of ICOM-CC, Kroller-Muller Museu, Oosterlo, the Netherlands, June 4-5, 2013.

Power, Protection and Magic in Thailand

The Cosmos of a Southern Policeman

ANU Press This biographical study of an unusual southern policeman explores the relationship between religion and power in Thailand during the early twentieth century when parts of the country were remote and banditry was rife. Khun Phan (1898-2006), known as Lion Lawman, sometimes used rather too much lethal force in carrying out his orders. He was the most famous graduate of a monastic academy in the mid-south, whose senior teachers imparted occult knowledge favoured by fighters on both sides of the law. Khun Phan imbibed this knowledge to confront the risks and uncertainty that lay ahead and bolster his confidence and self-reliance for his struggle with adversaries. Against the background of national events, the story is rooted in the mid-south where the policeman was born and died. Based on a wide range of works in Thai language, on field trips to the region and on interviews with local and regional scholars as well as the policeman's descendants, this generously illustrated book, accompanied by short video clips, brings to life the distinctive environment of the lakes district on the Malay Peninsula.

A History of South Africa

Reexamines the history of South Africa, traces the development of apartheid, and describes the anti-apartheid movement

Jesus the Exorcist

A Contribution to the Study of the Historical Jesus

Wipf and Stock Publishers That the synoptic writers believed that Jesus cast out demons and that such a role figured prominently in the Synoptics' portrait of him can scarcely be denied. And yet, only scant scholarly attention has been focused on Jesus' role as exorcist. Even less consideration has been given to the significance of Jesus as exorcist for understanding the historical Jesus. Now, in a provocative and insightful study, Graham Twelftree helps New Testament scholars move beyond such myopia. Twelftree examines exorcists and exorcism in first-century Palestine, assesses the New Testament accounts of demons and their demise, and explores the implications and significance of the fact that Jesus was indeed an exorcist. The volume appeared originally in the noted German series *Wissenschaftliche Untersuchungen zum Neuen Testament*.

Globalisation of Corporate Social Responsibility and its Impact on Corporate Governance

Springer This book addresses the increasing overlap between Corporate Social Responsibility (CSR) and law with a particular focus on company law and corporate governance. What is the impact of CSR on company law and corporate governance and, vice versa? How do these systems impact on CSR? Do they enable, require or prevent the socially responsible conduct of companies, for example, through corporate theory, directors' duties or disclosure laws? What is the role of shareholders and directors in the promotion of CSR? The theme of the book ensures a sharing of ideas and experiences globally and internationally for all jurisdictions to consider core legal and social aspects of CSR.

The Political Economy of Clean Energy Transitions

Oxford University Press A volume on the political economy of clean energy transition in developed and developing regions, with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies.

The Divine Province: Birthing New Earth

Ed Rychkun In *The Divine Province*, Jaemes McBride and Ed Rychkun answer a 26,000 year old question of how we manifest and maintain the Golden Age. They bring into reality the New Earth consciousness unfolding during the End Times. Taking readers on a 6000 year journey of Old Earth, they expose how Earthlings have been ruled by Elite powers and how their means of conquest has been religion and commerce under a corporate model of PLANET EARTH INC. Learn how the silent dominion has separated the Earthlings from spirit, accepting the physical slavery of the body vessel, disguising the truth of who they are. Now at the end of a 26,000 year cycle, a new consciousness has awakened multitudes of sleeping imprisoned souls to bring a New Earth into awareness, threatening the Rulers dominion and their business plan of the New World Order. It is about an awakening of who we are. Learn how the Divine Province has rapidly evolved as an expression of the new consciousness. See how it is now manifesting the physical birthing of New Earth, bringing the means from above in 5D consciousness to below into 3D reality, embodying the manifestation of peace, love, abundance and prosperity upon Old Earth. Divine Province is rapidly being populated by Divine beings of Light expressing themselves through Divine physical vessels who know who they are. In this book, the authors reveal how through rising above polarity and fear, one can choose the path leading to the alchemical gold of the Golden Age under Divine Province

In Search of Middle Indonesia

Middle Classes in Provincial Towns

BRILL The middle classes of Indonesia's provincial towns are not particularly rich yet nationally influential. This book examines them ethnographically. Rather than a market-friendly, liberal middle class, it finds a conservative petty bourgeoisie just out of poverty and skilled at politics. Please note that Sylvia Tidey's article (pp. 89-110) will only be available in the print edition of this book (9789004263000).

Tulipmania

Money, Honor, and Knowledge in the Dutch Golden Age

University of Chicago Press In the 1630s the Netherlands was gripped by tulipmania: a speculative fever unprecedented in scale and, as popular history would have it, folly. We all know the outline of the story—how otherwise sensible merchants, nobles, and artisans spent all they had (and much that they didn't) on tulip bulbs. We have heard how these bulbs changed hands hundreds of times in a single day, and how some bulbs, sold and resold for thousands of guilders, never even existed. Tulipmania is seen as an example of the gullibility of crowds and the dangers of financial speculation. But it wasn't like that. As Anne Goldgar reveals in *Tulipmania*, not one of these stories is true. Making use of extensive archival research, she lays waste to the legends, revealing that while the 1630s did see a speculative bubble in tulip prices, neither the height of the bubble nor its bursting were anywhere near as dramatic as we tend to think. By clearing away the accumulated myths, Goldgar is able to show us instead the far more interesting reality: the ways in which tulipmania reflected deep anxieties about the transformation of Dutch society in the Golden Age. "Goldgar tells us at the start of her excellent debunking book: 'Most of what we have heard of [tulipmania] is not true.' . . . She tells a new story."—Simon Kuper, *Financial Times*

21st Century Prometheus

Managing CBRN Safety and Security Affected by Cutting-Edge Technologies

Springer Nature This book describes the evolving CBRN risk landscape and highlights advances in the "core" CBRN technologies, including when combined with (improvised) explosive devices (CBRNe threats). It analyses how associated technologies create new safety and security risks, challenging certain assumptions that underlie current control regimes. The book also shows how technologies can be enablers for more effective strategies to mitigate these risks. 21st-century safety and security risks emanating from chemical, biological, radiological and nuclear materials - whether resulting from natural events, accidents or malevolent use - are increasingly shaped by technologies that enable their development, production or use in ways that differ from the past. Artificial intelligence, the use of cyberspace, the revolution in the life sciences, new manufacturing methods, new platforms and equipment for agent delivery, hypersonic weapons systems, information tools utilised in hybrid warfare - these and other technologies are reshaping the global security environment and CBRN landscape. They are leading to a growing potential for highly targeted violence, and they can lead to greater instability and vulnerability worldwide. At the same time, technology offers solutions to manage CBRN risks. Examples are faster detection, more accurate characterisation of the nature and origin of CBRN agents, new forensic investigation methods, or new medical treatments for victims of CBRN incidents. New educational concepts help to foster a culture of responsibility in science and technology and strengthen governance. New training methods help develop practical skills to manage CBRN risks more effectively. The book concludes that there is a growing need for a holistic framework towards CBRN risk mitigation. Traditional arms control mechanisms such as global, regional or bilateral treaties and export controls are still needed, as they provide a necessary legal and institutional framework. But laws and technology denial alone will not suffice, and institutional mechanisms can at times be weak. Given the pace of technological progress and the diffusion of critical knowledge, tools and materials, policymakers must accept that CBRN risks cannot be eliminated altogether. Instead, society has to learn to manage these risks and develop resilience against them. This requires a "softer", broadly based multi-stakeholder approach involving governments, industry, the research and development communities, educators, and civil society. Furthermore, educating policymakers that cutting-edge technologies may seriously affect global strategic stability could create incentives for developing a more creative and contemporary arms control strategy that fosters cooperation rather than incremental polarisation.

Fluent English

1100 Words You Need to Know

Barrons Educational Series Incorporated Contains over two hundred lesson plans that introduce students to new vocabulary words, each with a list of words with pronunciation keys, a paragraph that uses the words in context, sample sentences, definitions, and a daily idiom.
