Modern Hearing Aids

Verification, Outcome Measures, and Follow-up

Plural Publishing **Modern Hearing Aids: Verification, Outcome Measures, and Follow-Up** focuses on the selection and fitting of hearing aids and the outcome procedures and measures that follow. The world-renowned authors provide guidance for selecting prescriptive fitting approaches and detailed protocols for the use of behavioral measures and real-ear speech mapping to both verify the fitting and assess special hearing aid features. Extensive discussion is included regarding the techniques, procedures, and test protocols for probe-microphone measures. The authors have included numerous postfitting tests that can be conducted along with step-by-step protocols for their administration and scoring. Follow-up care and auditory training options also are reviewed. Written in an accessible and easy-to-read style, this text includes not only reference information, but also tools supported by research and clinical experience. The information is presented in a way that is both accessible to clinical students with little experience in the field and with enough depth for even the serious hearing aid researcher. Key features include Brief paragraphs identified as "Technical Tips," "Key Concepts," "Things to Remember," "Points to Ponder," and "Soapbox" for quick reference "Endnotes" at the back of the book--interesting tidbits of information not quite relevant enough to include in the chapters, but too good to toss aside Humor infused throughout
