#### ENGAGED LANGUAGE POLICY AND PRACTICES

---

*Taylor & Francis* Engaged Language Policy and Practices re-envisions language policy and planning as an engaged approach, drawing on and portraying theoretical and educational equity perspectives. It calls for the right to language policy-making in which all concerned—communities, parents, students, educators, and advocates—collectively imagine new strategies for resisting global neoliberal marginalization of home languages and cultural identities. This book subsequently emphasizes the means by which engaged dialectic processes can inform and clarify language policy-making decisions that promote equity. In other words, rather than descriptions of outcomes, the authors emphasize the need to detail the means by which local/regional actors resist and transform inequitable policies. These descriptions of processes thereby provide all actors with ideological, pedagogical, and equity policy tools that can inform situated school and community policy-making. This book depicts ways in which engaged language policy embodies the intersection of critical inquiry, participant involvement, and ongoing engaged language planning processes. It further offers an alternative to the traditional top-down approach to language education policy-making. Engaged Language Policy and Practices is essential reading for scholars, teachers, students, communities, and others concerned with worldwide language and identity equity.

##### ADDRESSING CROSS-CUTTING ISSUES

---

*Springer* This book aims to give a contribution to a more comprehensive and interdisciplinary understanding of the cross-cutting issues on energy, environment and health research topics in the current world scenario, where nations all over the world are struggling to accomplish the United Nations Sustainable Development Goals and to ensure sustainable patterns for all. This interdisciplinary implies a commitment between all fields of science, working together to provide knowledge that could result in the promotion of quality of life. At the present, it is evident that not all people benefit from sustainable policies and practices and the communication between health, energy, environmental and social problems is undeniable. A call for different views could be a pathway attracting universities, stakeholders, organizations and civil society to deeply discuss how one solution does not fit all societies. Few publications are coherently handling this matter. This book is expected to fill this gap and to develop an interest in a larger audience working in general sustainable development and cross-cutting issues. This book is produced by the European School of Sustainability Science and Research (ESSSR). It gives special emphasis to state-of-the-art descriptions of approaches, methods, initiatives and projects from universities, stakeholders, organizations and civil society across the world, regarding cross-cutting issues in energy, environment and health research.

**ARCHIPELAGO TOURISM****POLICIES AND PRACTICES**

*Routledge* Exploring the conceptual insights provided by the archipelagic 'twist' in the context of tourism principles, policies and practices, this volume draws on an international series of case studies to analyse best practice in branding, marketing and logistics in archipelago tourist destinations. The book asks and seeks to answer such questions as: How to 'sell' a multi-island destination, without risking a message that may be too complex and diffuse for audiences to grab on to? Does one encourage visitors to do 'island hopping'; and, if so, how and with what logistic facilities? How does one ascribe specific island destinations within an overall archipelago brand? Would smaller islands rebel against a composite branding strategy that actually benefits other islands? How does one read or craft transport policies as a function of the 'reterritorialisation' of a multi-island space? This book pioneers the exploration of the archipelago as tourism study focus (and not just locus); a heuristic device for rendering islands as sites of different tourism practices, industries and policies, but also of challenges and possibilities.

**WORLDWIDE ENGLISH LANGUAGE EDUCATION TODAY****IDEOLOGIES, POLICIES AND PRACTICES**

*Routledge* This book explores the ideologies, policies, and practices of English language education around the world today. It shows the ways in which ideology is a constituent part of the social realities of English language teaching (ELT) and how ELT policies and practices are shaped by ideological positions that privilege some participants and marginalize others. Each chapter considers the multiple ideologies underlying the thinking and actions of different members of society about ELT and how these inform overt and covert policies at the national level and beyond. They examine the implications of investigating ELT ideologies and policies for advancing socio-political understandings of practical aspects such as instruction, materials, assessment, and teacher education in the field. Introducing new perspectives on the theory and practice of language teaching today, this book is ideal reading for researchers and postgraduate students interested in applied linguistics and language education, faculty members of higher education institutions, English language teachers, and policy makers and planners.

## DEBATES ON EARLY CHILDHOOD POLICIES AND PRACTICES

---

## GLOBAL SNAPSHOTS OF PEDAGOGICAL THINKING AND ENCOUNTERS

---

*Routledge* Globally, Early Years policies and documents have set out aspirational outcomes and benefits for children, their families and the wider society. These policies have emphasised the place of early childhood provision within the wider global agenda, by tackling inequality and disadvantage early on in children's lives. However, these strategies have also raised further debates regarding the way they have informed and shaped curricula frameworks and pedagogical approaches. The international team of contributors to this book argue that if these issues are not explicitly acknowledged, understood, critiqued and negotiated, emerging policies and documents may potentially lead to disadvantaging, marginalising and even pathologising certain childhoods. Divided into two parts, the volume demonstrates the dialectic nature of both policy and practice. The chapters in this wide-ranging text: explore and articulate the philosophical premises and values that underpin current early childhood policy, curricula and pedagogies explicitly acknowledge and articulate some of potential conflicts and challenges they present provide examples of divergent and creative pedagogical thinking highlight opportunities for enabling pedagogical cultures and encounters. Debates on Early Childhood Policies and Practices is aimed at a wide readership including academics and researchers in early years education, policy makers, undergraduate and postgraduate students, practitioners and early childhood professionals.

## COURTROOM PRACTICES, POLICIES AND PROCEDURES

---

The criminal court system resolves disputes, imposes and maintains order and upholds human rights. The ability to give evidence in court in a competent and professional manner is a core skill for an investigator. The Criminal Trial describes and analyses the main rules of the law of evidence within a framework relevant to the policing profession. It is the emphasis placed on the policing profession and the professions role in the pre-trial and trial process as well as the discussion of issues pertaining to the "professional witness" which sets this text apart from others.

## WASTE MANAGEMENT POLICIES AND PRACTICES IN BRICS NATIONS

---

*CRC Press* Waste Management Policies and Practices in BRICS Nations explores recent developments in waste management. BRICS nations are the emerging economies of the world. Increasing populations, urbanization, industrialization and uses of chemical fertilizer and pesticide in agriculture for enhanced productivity of food, especially in India and China, to support the large populations harm the natural environment. The rise in the living standards of the human population has increased environmental pollution manifold, resulting in the huge generation of biodegradable and non-biodegradable waste simultaneously, which has contaminated natural resources such as soil, water and air. It has led to undesirable effects on the environment and human health. The book offers comprehensive coverage of the most essential topics, including: Waste management problems with special reference to MSW in Brazil, Russia, India, China and South Africa Solid waste management in BRICS nations Hazardous waste management in BRICS nations Policies and laws in BRICS nations This book contains both policies and methods used for the management of waste in BRICS nations. The chapters incorporate both policies and practical aspects.

## INNOVATION POLICIES AND PRACTICES WITHIN INNOVATION ECOSYSTEMS

---

*Routledge* While intense efforts of clarification have been made to distinguish between the concept of system and ecosystem, and between the different forms of ecosystems, very few works have addressed the issues of how these different forms of ecosystems are interacting in a dynamic perspective, or of how the notion of a dynamic ecosystem could emerge from the static frame of a system approach. The five chapters in this volume precisely aim at adding to this literature by highlighting the interplay between different types of innovation systems. A common thread among the five chapters of the book is the recognition of the need to develop new lenses to formally account for adaptative behaviour within clusters, networks or regional innovation systems using the ecosystem metaphor. The diversity and heterogeneity of agents, the complexity of relationships, and new forms of organisation (underground, middleground, and upperground) are the main characteristics of innovation ecosystems, in contrast to more traditional concepts like clusters or networks. In essence, the five chapters add various complexity dimensions (relationships, knowledge, systems, etc.) to the existing knowledge on ecosystems. The chapters in this book were originally published as a special issue of the journal Industry and Innovation.

#### RECLAIMING THE LOCAL IN LANGUAGE POLICY AND PRACTICE

---

*Routledge* This volume inserts the place of the local in theorizing about language policies and practices in applied linguistics. While the effects of globalization around the world are being discussed in such diverse circles as corporations, law firms, and education, and while the spread of English has come to largely benefit those in positions of power, relatively little has been said about the impact of globalization at the local level, directly or indirectly. Reclaiming the Local in Language Policy and Practice is unique in focusing specifically on the outcomes of globalization in and among the communities affected by these changes. The authors make a case for why it is important for local social practices, communicative conventions, linguistic realities, and knowledge paradigms to actively inform language policies and practices for classrooms and communities in specific contexts, and to critically inform those pertaining to other communities. Engaging with the dominant paradigms in the discipline of applied linguistics, the chapters include research relating to second language acquisition, sociolinguistics, literacy, and language planning. The majority of chapters are case studies of specific contexts and communities, focused on situations of language teaching. Beyond their local contexts these studies are important for initiating discussion of their relevance for other, different communities and contexts. Taken together, the chapters in this book approach the task of reclaiming and making space for the local by means of negotiating with the present and the global. They illuminate the paradox that the local contains complex values of diversity, multilingualism, and plurality that can help to reconceive the multilingual society and education for postmodern times.

#### SCHOOL POLICIES AND PRACTICES AFFECTING INSTRUCTION IN MATHEMATICS

---

#### FINDINGS FROM THE NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS

---

*U.S. Government Printing Office* The teaching and learning of mathematics continues to generate tremendous attention, both among those who support recent innovations and, more recently, among those who question the wisdom of the promulgated reforms. In order to bring an empirical basis to this debate, it is important to gather information on the policies and practices that are actually implemented. This report provides one source for such information and is the second in a series that discusses results from the National Assessment of Educational Progress (NAEP). A description of the educational policies and practices that prevailed during this period of sustained increases in mathematics achievement, giving particular attention to the relationship between these policies, practices, and student performance on the NAEP mathematics assessment. Information on the status of mathematics education in 1996 is provided, and changes that took place from the time of earlier NAEP assessments is also chronicled. (ASK)
