### GLOBAL INNOVATION AND ECONOMIC VALUE

Springer This book attempts to capture innovation outcomes. The intent is on a holistic assessment of value creation by innovation — the societal value that it delivers to humanity, the economic value that it has the potential to endow to nations, and the monetary value that it provides to innovating firms. With a range of anecdotal examples and empirical analysis, the book endeavours to answer the question: Have investments in innovation paid off? Big data and analytics underpin the development of the book material. The coverage is truly global, accentuating the economic value created by innovation in the technology and pharmaceutical sectors, the two largest bastions of innovation. In addition, it includes numerous examples of successful innovation in global companies while analyzing its economic/financial impact.

### QUANTITATIVE ECONOMIC POLICY

### ESSAYS IN HONOUR OF ANDREW HUGHES HALLETT

Springer Science & Business Media Econometric techniques and models are still being extensively used in the business of forecasting and policy advice. This book presents recent advances in the theory and applications of quantitative economic policy, with particular emphasis on fiscal and monetary policies in a European and global context. The volume honors Andrew Hughes Hallett, a pioneer and major scientist in quantitative economic policy analysis, whose contributors are among his friends and former students.

### HEARINGS, REPORTS AND PRINTS OF THE JOINT ECONOMIC COMMITTEE

### THE EURO IN THE 21ST CENTURY

### ECONOMIC CRISIS AND FINANCIAL UPROAR

Routledge The Euro in the 21st Century clarifies the perception of the euro and empirically demonstrates that the euro has become a true common currency and the Eurozone a true optimal currency area, presenting, in turn, a model to imitate. In order to demonstrate this, this study analyzes the economic and monetary requirements and policies required to introduce a common currency as well as the theoretical underpinnings of both the European integration process and the historical economic, monetary, political, and social circumstances that favoured the creation of the economic and monetary union. Furthermore, this book sheds light on how the current economic and monetary circumstances are affecting the euro project through and analysis of three intertwined issues. It studies how the economic chaos and financial uproar, which has plagued the Eurozone and world economy since 2008, has affected the single-currency regime as well as the current image of the euro worldwide. Moreover it summarizes the lesson to be learnt from what can be considered 'the first euro crisis'. Finally, it thoroughly analyzes the behaviour of the US Federal Reserve, the European Central Bank, and the International Monetary Fund during this crisis. This book draws on and contributes to several bodies of literature within Political Economy, Economics, and International Relations and is particularly relevant at this time given that the current unfolding economic imbalances are causing some Eurozone Member States to rethink their economic and political views concerning the euro.

### THE COLLECTED SCIENTIFIC PAPERS OF PAUL A. SAMUELSON

MIT Press "It is a measure of Professor Samuelson's preeminence that the sheer scale of his work should be so much taken for granted," observes a reviewer in the Economist who goes on to note that "a cynic might add that it would have been better for Professor Samuelson to write less merely to give others a chance to write at all." In fact, Samuelson's output, his "extraordinary mastery of methods, both mathematical and linguistic" (review of Volume 4 of The Collected Scientific Papers), have not diminished. Volumes 1 through 4

encompass more than 280 articles. The first two contain virtually all of Samuelson's contributions to economic theory through mid-1964; Volume 3 contains all the scientific papers written from mid-1964 through 1970, and the last volume brings his work up to through 1976.

#### AMERICAN AGRICULTURE AND THE PROBLEM OF MONOPOLY

---

#### THE POLITICAL ECONOMY OF GRAIN BELT FARMING, 1953-1980

---

U of Nebraska Press The breathtaking number of mergers and joint ventures among agribusiness firms has left independent American farmers facing the power of an increasingly concentrated buying sector. The origin of farmers' concern with such economic concentration dates back to protests against meatpackers and railroads in the late nineteenth century. Jon Lauck examines the dimensions of this problem in the American Midwest in the decades following World War II. He analyzes the nature of competition within meat-packing and grain markets. In addition, he addresses concerns about corporate entry into production agriculture and the potential displacement of a production system defined by independent family farms. Lauck also considers the ability of farmers to organize in order to counter the market power of large-scale agribusiness buyers. He explores the use of farmer cooperatives and other mechanisms which may increase the bargaining power of farmers. The book offers the first serious historical examination of the National Farmers Organization, which fully embraced the bargaining power cause in the postwar period. Lauck finds that independent farmers' attempts at organization have been more successful than previously recognized, but he also shows that their successes have been undermined by the growing concentration and power of agri-business firms, justifying a new approach to antitrust law in agricultural markets.

#### FINANCING FOR LOW-CARBON ENERGY TRANSITION

---

#### UNLOCKING THE POTENTIAL OF PRIVATE CAPITAL

---

Springer This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public-private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?

#### THE SHADOW OF A DREAM : ECONOMIC LIFE AND DEATH IN THE SOUTH CAROLINA LOW COUNTRY, 1670-1920

---

#### ECONOMIC LIFE AND DEATH IN THE SOUTH CAROLINA LOW COUNTRY, 1670-1920

---

Oxford University Press, USA This important new book charts the economic and social rise and fall of a small, but intriguing part of the American South: Charleston and the surrounding South Carolina low country. Spanning 250 years, Coclanis's study analyzes the interaction of both external and internal forces on the city and countryside, examining the effects of various factors--the environment, the market, economic and political ideology, and social institutions--on the region's economy from its colonial beginnings to its collapse in the 19th and early 20th centuries.

#### POLITICAL ECONOMY OF HUNGER

---

#### VOLUME 1: ENTITLEMENT AND WELL-BEING

---

Clarendon Press This is an open access title available under the terms of a CC BY-NC-ND 3.0 IGO licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. WIDER Studies in Development Economics The World Institute for Development Economics Research, established in 1984, started work in Helsinki in 1985, with the financial support of the Government of Finland. The principal purpose of the Institute is to help identify and meet the need for policy-oriented socio-economic research on pressing global and development problems and their inter-relationships. WIDER's research projects are grouped into three main themes: hunger and poverty; money, finance, and trade; and development and technological transformation. BL Sen is an internationally renowned, prizewinning economist This volume is the first of three addressing a wide range of policy issues relating to the role of public action in combating hunger and deprivation in the modern world. It deals with the background nutritional, economic, social, and political aspects of the problem of world hunger. Topics covered include the characteristics and causal antecedents of famines and endemic deprivation, the interconnections between economic and political factors, the role of social relations and the family, the special problems of women's deprivation, the connection between food consumption and other indicators of living standards, and the medical aspects of undernourishment and its consequences. Several contributions also address the political background of public policy, in particular the connection between the government and the public, including the role of newspapers and the media, and the part played by political commitment and by adversarial politics and pressures. Taken together, these essays provide a comprehensive and authoritative analysis of the problem of hunger and deprivation, and an important guide for action.

#### ECONOMIC INTERDEPENDENCE AND WAR

---

Princeton University Press Does growing economic interdependence among great powers increase or decrease the chance of conflict and war? Liberals argue that the benefits of trade give states an incentive to stay peaceful. Realists contend that trade compels states to struggle for vital raw materials and markets. Moving beyond the stale liberal-realist debate, Economic Interdependence and War lays out a dynamic theory of expectations that shows under what specific conditions interstate commerce will reduce or heighten the risk of conflict between nations. Taking a broad look at cases spanning two centuries, from the Napoleonic and Crimean wars to the more recent Cold War crises, Dale Copeland demonstrates that when leaders have positive expectations of the future trade environment, they want to remain at peace in order to secure the economic benefits that enhance long-term power. When, however, these expectations turn negative, leaders are likely to fear a loss of access to raw materials and markets, giving them more incentive to initiate crises to protect their commercial interests. The theory of trade expectations holds important implications for the understanding of Sino-American relations since 1985 and for the direction these relations will likely take over the next two decades. Economic Interdependence and War offers sweeping new insights into historical and contemporary global politics and the actual nature of democratic versus economic peace.

#### MILITARY EXPANSION, ECONOMIC DECLINE

---

#### IMPACT OF MILITARY SPENDING ON UNITED STATES ECONOMIC PERFORMANCE

---

Routledge By assessing the costs and benefits of military spending, the authors provide a "second opinion" on the subject of military economics. While advocates of increased military spending often stress the positive effects of the Pentagon on the economy, there has been little systematic summary of the "opportunity costs" that society pays for a large military establishment. This book fills that gap.

#### ENVIRONMENTAL ECONOMICS AND MANAGEMENT: THEORY, POLICY, AND APPLICATIONS

---

Cengage Learning Provides an applied, practical approach to environmental economic theory that is accessible to students who have had minimal exposure to economics as well as those with an advanced understanding. With a strong focus on policy and real-world issues, Callan/Thomas's ENVIRONMENTAL ECONOMICS AND MANAGEMENT: THEORY, POLICY AND APPLICATIONS, Fifth Edition, complements economic theory with timely, real-world applications. Undergraduate or MBA students gain a clear perspective of the relationship between market activity and the environment. This text integrates a strong business perspective into the development of environmental decision making for a unique vantage point often overlooked in more conventional approaches. Students learn to use economic analytical tools, such as market models, benefit-cost analysis, and risk analysis, effectively to assess environmental problems and to evaluate policy solutions. With a proven, modular structure, this edition provides a well-organized presentation with the flexibility to tailor the presentation to your needs. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

### **ENTREPRENEURSHIP AND LOCAL ECONOMIC DEVELOPMENT**

---

Lexington Books Entrepreneurship and Local Economic Development delves into the current thinking on local entrepreneurship development programs and evaluates ways in which practitioners can implement successful entrepreneurship practices. Examining the role and potential for entrepreneurship programs in local economic development strategies, contributors to this edited collection have many years of experience working with entrepreneurship initiatives in state and local governments. Focused on theory and case study, Entrepreneurship and Local Economic Development examines conceptual issues involved in creating entrepreneurship programs as well as practical examples of programs organized by state, regional, and local agencies.

### **THE LEGACY OF OLIVER WENDELL HOLMES, JR**

---

Stanford University Press "On his retirement from the Supreme Court at the age of 90 in 1932, Oliver Wendell Holmes, Jr. was celebrated as few judges have ever been, beloved and revered as a national treasure. Holmes's influence, magnified into legend by the attention he has continued to receive, has helped to constitute the identity of the legal profession, the conception of the judicial function, and the role of the public intellectual in modern American culture." "The present collection of seven essays attempts to view Holmes's work apart from the restricted framework supplied by traditional jurisprudence by reassessing Holmes as an intellectual, a legal theorist, and an iconic public figure and culture hero. Each essay adds something new and distinctive to the scholarly controversies that have surrounded Holmes for over a century." "J. W. Burrow begins the volume by looking at Holmes's relations to various strands of Victorian social thought. The next three essays approach, each from a different angle, the problem of Holmes's relationship to formalism or classical orthodoxy in legal thought. Morton Horwitz provides a sweeping reassessment of the development of Holmes's legal thinking between the early period of the 1870's and 1880's and "The Path of the Law" in 1897. Mathias Reimann presents the first thorough exploration of Holmes's use - misuse, more often - of German philosophy, notably his discrediting, in The Common Law, of the legacy of Kant and Hegel. Stephen Diamond approaches Holmes's jurisprudence and his broader social and personal views by another original pathway, his legal opinions in taxation cases and his private views on taxation." "The final three essays consider Holmes as a man of letters and "representative" man of the American scene, both as he created himself and as he was created by others. Robert Ferguson shows how Holmes deliberately went about the work of fashioning the public persona of a judge. Peter Gibian shows how Holmes's construction of his public style was formed as a deliberate reaction against that of his famous father, Dr. Oliver Wendell Holmes, Sr. The final essay by David Hollinger has a dual purpose: to ask what Holmes meant by the "scientific way of looking at the world" and to discover how Holmes came to be such a hero to liberal Jewish intellectuals like Felix Frankfurter and Harold J. Laski."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
