The Car Hacker's Handbook

A Guide for the Penetration Tester

No Starch Press Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

We Are Now Beginning Our Descent

A Novel

Open Road + Grove/Atlantic "[A] sharply observed meditation on modern war . . . as far from Tom Clancy's entertainments as a vintage Mini Cooper is from a snarling Hummer" (Alex Berenson, The New York Times Book Review). James Meek's masterful historical novel, The People's Act of Love, received accolades around the world, earning Meek comparisons to Tolstoy, Dostoyevsky, Conrad, and Greene. We Are Now Beginning Our Descent is a tour de force of storytelling, furthering his reputation as one of the most exciting and original young novelists writing today. Adam Kellas, a British journalist, would-be thriller novelist, and failed lover meets Astrid Walsh, a self-possessed, hard-charging reporter while the two are covering allied military operations in the Afghan mountains. After sharing one passionate night in a watchtower near a defunct airfield, Astrid disappears from Adam's life. A year later, following a disastrous dinner party in London during which he destroys his few remaining friendships, Adam receives a short, beseeching email and hastily embarks on a transatlantic journey to a small town near the Chesapeake Bay where he believes Astrid waits for him. He envisions the fresh start his new life with Astrid might offer, unaware that she may be harboring unsettling secrets of her own. A passionate, incisive novel, We Are Now Beginning Our Descent lays bare the entwined hypocrisies, foibles, and desires of our age, and is a testament to the obsessive pull of love. "I am full of admiration for Meek's precise and lyrical prose, for his mapping of the political landscapes through which his characters drift and for his evocation of the strange, torn geometries of the life in the global news stream." —The Washington Post

Thinking Literature across Continents

Duke University Press Thinking Literature across Continents finds Ranjan Ghosh and J. Hillis Miller—two thinkers from different continents, cultures, training, and critical perspectives—debating and reflecting upon what literature is and why it matters. Ghosh and Miller do not attempt to formulate a joint theory of literature; rather, they allow their different backgrounds and lively disagreements to stimulate generative dialogue on poetry, world literature, pedagogy, and the ethics of literature. Addressing a varied literary context ranging from Victorian literature, Chinese literary criticism and philosophy, and continental philosophy to Sanskrit poetics and modern European literature, Ghosh offers a transnational theory of literature while Miller emphasizes the need to account for what a text says and how it says it. Thinking Literature across Continents highlights two minds continually discovering new paths of communication and two literary and cultural traditions intersecting in productive and compelling ways.

Diesel Fuel Injection

Diesel and Gasoline Engine Exhausts and Some Nitroarenes

In 1988, IARC classified diesel exhaust as probably carcinogenic to humans (Group 2A). An Advisory Group which reviews and recommends future priorities for the IARC Monographs Program had recommended diesel exhaust as a high priority for re-evaluation since 1998. There has been mounting concern about the cancer-causing potential of diesel exhaust, particularly based on findings in epidemiological studies of workers exposed in various settings. This was re-emphasized by the publication in March 2012 of the results of a large US National Cancer Institute/National Institute for Occupational Safety and Health study of occupational exposure to such emissions in underground miners, which showed an increased risk of death from lung cancer in exposed workers. The scientific evidence was reviewed thoroughly by the Working Group and overall it was concluded that there was sufficient evidence in humans for the carcinogenicity of diesel exhaust. The Working Group found that diesel exhaust is a cause of lung cancer (sufficient evidence) and also noted a positive association (limited evidence) with an increased risk of bladder cancer (Group 1). The Working Group concluded that gasoline exhaust was possibly carcinogenic to humans (Group 2B), a finding unchanged from the previous evaluation in 1989.
