As recognized, adventure as well as experience nearly lesson, amusement, as capably as covenant can be gotten by just checking out a book **Society And Family Population Age Of Meanings Cultural Bio The Clocks Human** then it is not directly done, you could acknowledge even more re this life, something like the world.

We meet the expense of you this proper as with ease as easy habit to acquire those all. We pay for Society And Family Population Age Of Meanings Cultural Bio The Clocks Human and numerous ebook collections from fictions to scientific research in any way. in the middle of them is this Society And Family Population Age Of Meanings Cultural Bio The Clocks Human that can be your partner.

**KEY=MEANINGS - MILES ORTIZ**

## Human Clocks

### The Bio-cultural Meanings of Age

[Peter Lang](#) **Age** is a complex cross-cutting notion for at least two reasons: the intricate interweaving of its biological and socio-cultural meanings and its dual significance as both a benchmark in an individual's life course and a foundation for social structure. This book offers new perspectives on age and ageing by combining achievements in the biological sciences and their different applications and interpretations in demography, anthropology, psychology and other pertinent disciplines. Thirty contributors from these various fields revisit the measures and the biological models of ageing, the borderline between normal and pathological ageing, the pertinence of chronological age as a benchmark along the life course, its interrelations with psychological development, with reproductive phases and other life events, the «normalizing» role ascribed by age classes and the risk of falling into ageism, the cross-cultural diversity and temporal changes of its meanings, the gender divide (real and perceived), as well as the rights that should be enjoyed at each age.

### The Future of the Public's Health in the 21st Century

[National Academies Press](#) The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

### Making Eye Health a Population Health Imperative

#### Vision for Tomorrow

[National Academies Press](#) The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

### Intergenerational Support and Old Age in Africa

[Transaction Publishers](#) In most societies of the world, including in Africa, re- sponsibility for the material support of older people unable to sustain themselves through work or investments originally resided with their younger generational family members--especially their adult children. Aboderin explores this topic specifically for Africa. In the wake of social or economic change, societies experience shifts in the degree to which families support their elders. Questions about the proper balance of family and state responsibility, however, persist, especially in light of socio-demographic trends and constraints in public expenditure. In most of sub-Saharan Africa, in contrast to other world regions, economic security policies for older people have not yet been formulated, despite declines in material family support along with rising poverty to which a growing elderly population is exposed. In part, this betrays the crucial lack of understanding about how and why these shifts in support have occurred in African societies--and, thus, a profound uncertainty about what balance of individual, family, and state responsibilities will be culturally appropriate and effective in ensuring economic security for older Africans both now and in the future. Aboderin aims to address these gaps in understanding. She provides an empirical and theoretical analysis of the micro and macro level processes that have underpinned recent declines in old age family support in African societies and likely parameters of future familial support. She also addresses more fundamental theoretical questions about how we should think about the relationships between intergenerational support, norms and values, and societal change. Intergenerational Support in Africa will be of interest to students of African studies, economic policy and theory concerning eldercare, sociology, and social welfare development.

### Communities in Action

#### Pathways to Health Equity

[National Academies Press](#) In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

### Population and Society

[SAGE](#) "An excellent introduction to the study of population and its significance for many of the key social, political, cultural and environmental issues facing the world today. It covers population growth, ageing, migration and mobility, parenting, health inequalities, and much more... The authors do not shy away from areas of continuing debate, providing both sides of an argument and encouraging readers to follow up the original sources" - Tony Champion, Emeritus Professor of Population Geography, Centre for Urban, Regional & Development Studies, Newcastle University and Vice President, British Society for Population Studies, 2011-2013 Population and Society is an undergraduate introduction to population that explains the latest trends in population studies. The text provides a detailed and completely accessible overview that: situates demographic events - fertility, mortality and migration - within the context of broader social impacts and theorisations like social inequalities, individualisation and life course analysis uses global illustrative examples to demonstrate the importance of data and data interpretation in population studies is illustrated throughout with pedagogic features, like chapter opening summaries, suggestions for further readings and case study examples. This text will be widely used as the standard and most up-to-date text on population and society for courses across the social sciences.

## Community/Public Health Nursing Practice Health for Families and Populations

[Elsevier Health Sciences](#) A practical approach helps you learn and apply core concepts of community and public health nursing. This text emphasizes both community and family as client, so you'll gain a solid understanding of these important specialties. Numerous real-life examples demonstrate your roles and responsibilities as a community health nurse.

## Field Hearing Before the Subcommittee on Health of the Committee on Finance, United States Senate, Ninety-eighth Congress, Second Session, August 13, 1984

## The Second Media Age

[John Wiley & Sons](#) This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".

## A Shrinking Society

## Post-Demographic Transition in Japan

[Springer](#) This is the book to focus on a new phenomenon emerging in the twenty-first century: the rapidly aging and decreasing population of a well-developed country, namely, Japan. The meaning of this phenomenon has been successfully clarified as the possible historical consequence of the demographic transition from high birth and death rates to low ones. Japan has entered the post-demographic transitional phase and will be the fastest-shrinking society in the world, leading other Asian countries that are experiencing the same drastic changes. The author used the historical statistics, compiled by the Statistic Bureau, Ministry of Internal Affairs and Communications in 2006 and population projections for released in 2012 by the National Institute of Population and Social Security Research, to show the past and future development of the dependency ratio from 1891 to 2060. Then, utilizing the population life table and net reproduction rate, the effects of increasing life expectancy and declining fertility on the dependency ratio were observed separately. Finally, the historical relationships among women's survival rates at reproductive age, the theoretical fertility rate to maintain the replacement level and the recorded total fertility rate (TFR) were analyzed. Historical observation showed TFR adapting to the theoretical level of fertility with a certain time lag and corresponding to women's survival rates at reproductive age. Women's increasing lifespan and survival rates could have influenced decision making to minimize the risk of childbearing. Even if the theoretical fertility rate meets the replacement level, women's views of minimizing the risk may remain unchanged because for women the cost-benefit imbalance in childbearing is still too high in Japan. Based on the findings, the author discusses the sustainability of Japanese society in relation to national finances, social security reform, family policies, immigration policies and community policies.

## China Statistical Yearbook

## Aging, the Individual, and Society

[Cengage Learning](#) Updated throughout with relevant new examples, research, and photos, **AGING, THE INDIVIDUAL, AND SOCIETY**, Tenth Edition, brings a social problems approach to the interdisciplinary study of gerontology. This accessible text combines academic research with an empathetic view of the lives of older people to involve students emotionally and intellectually in the material. Activities offer many opportunities for experiential learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## The Sociology of the Family

## The European Peasant Family and Society

## Historical Studies

[Liverpool University Press](#) In recent years the peasant household has become a central focal point of social history. This is true not only because the peasant represents the major element of European society through the nineteenth century, but also because many of the main issues in modern historical debate can be studied within the sphere of the peasant family. This book deals with the European peasant family during the period of transformation from agrarian to industrial society, the time called by some the period of protoindustrialization. The essays in this volume explore some of the major issues concerning the influence of the economy, society and institutions on the peasant household and, conversely, the influence of the peasant household on the outside world. Themes dealt with include the ways in which the physical environment and the economy may make for very different family structures and even affect intra-family relationships; the effects of inheritance, marriage and kinship strategies, as well as social pressure, on peasant family structure and demography; the debate about changing gender roles and status; the debate over the manner and effects of class formation; questions of social and political agency; the nature of gender and parent-child relations; the validity of protoindustrial theory; and the role of peasants in initiating industrialization as consumers, producers and as a labor force. In examining these themes, the essays provide both case studies and innovative analysis by preeminent international scholars in the fields of family and women's history, economic history and demography.

## American Society

## An Introduction to Macrosociology

[Rowman & Littlefield](#) This text invites students to pursue a career in sociology, entices others to consider advanced courses, and yet serves those who will take but one sociology course. This basic textbook for Introduction to Sociology can also serve well in courses in American Society.

## Prolonged Connections

## The Rise of the Extended Family in Nineteenth-century England and America

Steven Ruggles

### Understanding the Meaning of Community Engagement for Aging in Place Within a Social Capital Framework

This study explored the meaning of community engagement of older adults, within a social capital framework, in a community noted for its relatively high concentration of active, older adults. The multiple meanings of community engagement within the creation of a place of age were investigated using concepts derived from a social capital framework. A place of age is where older adults are integral to family life, participate in community life, and bring collective life experiences and wisdom to civic life. This research addresses gaps in the current literature about suburban places and the meanings of community engagement for an aging population within these places. The importance of this research lies with expanding the understanding of the multiple meanings of community engagement and the potential for reinforcing, through public policy, these meanings through the development and support of the social capital created by older adults in places of age. The research methodology was an in-depth case study analysis of West Saint Paul, Minnesota. In-person, semistructured interviews were conducted with 21 individuals, aged 65 years and older, who had been residents of West Saint Paul for at least 25 years. Findings of this study revealed multiple meanings of community and community engagement for study participants, but all had a strong sense of community relative to their neighborhoods and the city of West Saint Paul. All had well-developed social networks that involved family members, friends, and neighbors. Nearly all engaged in neighboring behaviors of helping out when needed and generally looking out for one another. All participants expressed a feeling of trust of others within their own neighborhoods, and most did not feel trusting of others beyond their neighborhoods. All participants had consistently voted, and all engaged in formal civic activities at some point in their lives. All participants, lifelong volunteers, were members of a Christian church, and much of their volunteer time was given to church activities. The key finding from this study was the important role of neighboring behaviors, faith-based affiliation, and family in the meaning of community engagement within each participant's life.

### Community/Public Health Nursing - E-Book

#### Promoting the Health of Populations

[Elsevier Health Sciences](#) Master the knowledge and skills you need to succeed in community health nursing! Community/Public Health Nursing, 8th Edition discusses the nurse's role in population health promotion with a unique upstream preventive focus and a strong social justice approach, all in a concise, easy-to-read text. It shows how nurses can take an active role in social action and health policy -- especially in caring for diverse and vulnerable population groups. This edition integrates the NCSBN Clinical Judgment Measurement Model to help you prepare for the Next Generation NCLEX(R). Clinical examples and photo novellas show how nursing concepts apply to the real world. Active Learning boxes test your knowledge of the content you've just read, helping provide clinical application and knowledge retention. UNIQUE! Social justice approach promotes health for all people, emphasizing society's responsibility to protect all human life and ensure that all people have their basic needs met, such as adequate health protection. UNIQUE! Veterans' Health chapter presents situations and considerations unique to the care of military veterans. Genetics in Public Health boxes reflect increasing scientific evidence supporting the health benefits of using genetic tests and family health history to guide public health interventions. UNIQUE! Upstream focus addresses contributing factors of poor health and promotes community efforts to address potential health problems before they occur. Case studies present the theory, concepts, and application of the nursing process in practical and manageable examples. UNIQUE! Photo novellas -- stories in photograph form -- show real-life clinical scenarios and highlight the application of important community/public health nursing roles. Consistent pedagogy at the beginning of each chapter includes learning objectives, key terms and chapter outlines to help you locate important information and focus your study time. Clinical Examples present snippets of real-life client situations. Theoretical frameworks common to nursing and public health aid in the application of familiar and new theory bases to problems and challenges in the community. Research Highlights introduce you to the growing amount of community/public health nursing research literature. Ethical Insights boxes present situations of ethical dilemmas or considerations pertinent to select chapter topics. NEW! Online case studies for the Next Generation NCLEX(R) Examination (NGN) provide you with the necessary tools to prepare for the NGN. NEW! Overview of the NCSBN Clinical Judgment Measurement Model provides information on the latest recommendations to promote evidence-based client decisions. NEW! Healthy People 2030 boxes highlight the most current national health care goals and objectives throughout the text.

#### The Future of Families to 2030

[OECD Publishing](#) This report explores likely future changes in family and household structures in OECD countries; identifies the main forces shaping the family landscape to 2030; discusses the longer-term challenges; and suggests policy options for managing the challenges.

#### Society at a Glance: Asia/Pacific 2011

[OECD Publishing](#) This book provides a series of social indicators and includes chapters covering the general context, self-sufficiency, equity, health, and social cohesion. It also includes a special chapter on unpaid work.

#### The Politics of Duplicity

#### Controlling Reproduction in Ceausescu's Romania

[Univ of California Press](#) The political hypocrisy and personal horrors of one of the most repressive anti-abortion regimes in history came to the world's attention soon after the fall of Romanian dictator Nicolae Ceausescu. Photographs of orphans with vacant eyes, sad faces, and wasted bodies circled the globe, as did alarming maternal mortality statistics and heart-breaking details of a devastating infant AIDS epidemic. Gail Kligman's chilling ethnography--of the state and of the politics of reproduction--is the first in-depth examination of this extreme case of political intervention into the most intimate aspects of everyday life. Ceausescu's reproductive policies, among which the banning of abortion was central, affected the physical and emotional well-being not only of individual men, women, children, and families but also of society as a whole. Sexuality, intimacy, and fertility control were fraught with fear, which permeated daily life and took a heavy moral toll as lying and dissimulation transformed both individuals and the state. This powerful study is based on moving interviews with women and physicians as well as on documentary and archival material. In addition to discussing the social implications and human costs of restrictive reproductive legislation, Kligman explores the means by which reproductive issues become embedded in national and international agendas. She concludes with a review of the lessons the rest of the world can learn from Romania's tragic experience.

#### Nursing Staff in Hospitals and Nursing Homes

##### Is It Adequate?

[National Academies Press](#) Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in Nursing Staff in Hospitals and Nursing Homes, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel--and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. Nursing Staff in Hospitals and Nursing Homes provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system.

#### Oxford Textbook of Old Age Psychiatry

[Oxford University Press, USA](#) Part of the authoritative Oxford Textbooks in Psychiatry series, Oxford Textbook of Old Age Psychiatry, Third Edition has been thoroughly updated to reflect the developments in old age psychiatry since publication of the Second Edition in 2013, and remains an essential reference for anyone interested in the mental health care of older people.

## Parenting Matters

### Supporting Parents of Children Ages 0-8

[National Academies Press](#) Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

## Bulletin on Aging

### Aging, Society, and the Life Course

[Springer Publishing Company](#) As our aging population grows ever larger, it is increasingly important to understand how adults age and what we can do to provide up-to-date care to ensure their well-being as an integral part of society. Leslie Morgan and Suzanne Kunkel understand that this phenomenon is about much more than just the physical or biological aspects of growing older and have put together a comprehensive text on the impact of society and sociology on the aging process. Use this text to explore the diversity of the aging population and dispel the major stereotypes surrounding the elderly. Learn about aging through all the layers of social context from family life to politics and economics. And through this approach, come to see how aging is more than just an individual process, it is a process that effects the direction of our society as a whole. For the Student: : Web sites of interest and key terms defined at the end of each chapter.; Real life stories and essays on love, sex, music, medicine, and crime. For the Professor: : Assignment-ready reading in a One Chapter a Week format.; Questions for discussion and review at each chapter end.; Applying Theory sections place the lesson of each chapter in a clear, real-world setting. Instructor's Guide Now Available! An Instructor's Manual for this textbook is available for those professors who have adopted Aging, Society, and the Life Course, Third Edition and can verify a bookstore order of 7 or more copies. Please email our Marketing Department at [marketing@springerpub.com](mailto:marketing@springerpub.com) if you have adopted this text as you will need a password to download the guide. Please provide the name and telephone number of the bookstore that ordered the textbooks. A print version of the Instructor's Manual is also available!

## Upland Communities

### Environment, Population and Social Structure in the Alps Since the Sixteenth Century

[Cambridge University Press](#) This book follows the social, economic and demographic transformations of the Alpine area from the late Middle Ages. Its aim is to reassess the image of the upland community which emerges from the work of historians, geographers and social anthropologists. The book therefore deals at length with such problems as the causes and consequences of emigration and patterns of marriage and inheritance in favouring or hampering the adjustments of local populations to changing economic or ecological circumstances, and tackles the vexed question of the relative importance of cultural and environmental factors in shaping family forms and community structures. Although its foundation lies in a long period of anthropological fieldwork conducted in an Alpine community, Upland Communities relies on the methods and conceptual tools of historical demography. Combined with a long-term historical perspective, its broad comparative approach unveils an unexpected diversity in regional and spatial demographic patterns and questions a number of deep-rooted but ultimately misleading notions concerning mountain society and its alleged backwardness in the past.

## Below-replacement fertility in industrial societies

causes, consequences, policies ; based on papers presented at a seminar held at the Hoover Institution, Stanford Univ., Nov. 1985

[Cambridge University Press](#)

## Easing the Family Caregiver Burden, Programs Around the Nation

Forum Before the Special Committee on Aging, United States Senate, One Hundred Fifth Congress, Second Session, Washington, DC, September 10, 1998

## Provinces

### Canadian Provincial Politics, Second Edition

[University of Toronto Press](#) Provinces is both a study of Canadian provincial government and a review of comparative politics. As such, it represents a long overdue return to the comparative tradition with its emphasis on subject-specific studies across the country. The chapters in this revised edition of Provinces, each of which has been written for the book by a leading scholar, are arranged according to four major sections: political life, institutions, public administration, and public policy. Making the book highly suitable for those interested in areas beyond provincial politics. At the same time, the adopted comparative approach reveals a wealth of insight into Canadian politics at the beginning of the new millennium. This new edition covers some of the vital concerns of our time: a disquiet about the quality of democracy, concern about women's place in provincial societies, interest in the nature and potential of governance in the north, unease on the question of the fiscal imbalance between all orders of government, a sensitivity to the needs of cities and communities, assessment of the retrenchment of the state, and consideration of the policy futures influenced by the changing demography of the provinces. Special Combined Price: Provinces, second edition may be ordered together with The Provincial State in Canada: Politics in the Provinces and Territories at a special discounted price. In order to secure the package price, the following ISBN must be used when ordering: 978-1-55402-587-9.

## Population and Canadian Society

### Public/Community Health and Nursing Practice

## Caring for Populations

[F.A. Davis](#) This unique, problem-solving, case-based approach shows you how. You'll encounter different case studies in every chapter—that explore concepts such as community assessments, public health policy, and surveillance. Step by step, you'll develop the knowledge and skills you need to apply public health principles across a variety of health care settings, special populations, and scenarios.

## Ministry With the Aging Designs, Challenges, Foundations

[Routledge](#) **Ministry With the Aging**--the one most frequently used textbook in seminary courses that deal with ministry and aging--is now available from The Haworth Press. Here is a genuinely useful and informative text in which an all-star cast of authors reflects on the current situation of the aged in our society. Ministry With the Aging encourages a deeper appreciation of the presence and role of aging people with contemporary religion, addresses the challenges that the church and society face in a rapidly aging society, and provides practical applications for an effective ministry with the aging. Each chapter, whether it focuses on the role of the elderly in the early church, death and dying, ageism, retirement, or caring for elderly parents, is written by an eminent scholar who has chosen only the most relevant issues for discussion. A past runner up for the "Book of the Year Award" by the Academy of Parish Clergy, Ministry With the Aging is a landmark volume that can offer theology students a unique and insightful look at how they can best meet the needs of their elderly parishioners.

## Russian Provincial Society

### An Empirical Analysis

[Springer Nature](#) This book presents a unique analysis of modern Russian provincial society. Based on detailed empirical evidence, it develops a theoretical model of Russian provincial society in the late 20th century and the early 21st century. The book explains how under the conditions of catastrophic changes, Russian provincial societies have undergone a structural transformation. It further sheds light on the transformation of the economic behavior of the population and households with regard to economic practices, crafts, and revived archaic forms of labor behavior. Summarizing the extensive empirical evidence, the book puts forward the concept of complementarity of two social structures at the local level: a ground "soft communal" structure and a "tightening with an iron hoop" estate state structure. Next, it discusses the stability and resistance of the local social structure to external political disturbances. Based on the presented analysis, the book introduces several independent criteria on the basis of which it establishes the typology of all empirically observed forms of societies. Subsequently, the book identifies six main types of Russian provincial societies. It explains how depending on the type, the different societies either adapt to political and economic changes in different ways, stay unchanged or transform their structure. The book will appeal to students, scholars, and researchers of economics, political science, sociology, and anthropology, interested in a better understanding of transformation studies, population and household economics, provincial societies, as well as Russian societal structures.

## Critical Questions for Ageing Societies

This myth-busting and question-focused textbook tackles the important social and policy issues posed by ageing. A unique pedagogical approach recognises the gap between the lives of students and older people, and equips students with the conceptual, analytical and critical tools to understand what it means to grow old and live in an ageing society.

## Essentials of Global Community Health

[Jones & Bartlett Publishers](#) **Essentials of Global Community Health** offers current and future clinicians, public health professionals, and administrators a comprehensive resource on providing community-oriented health care. This essential reference delves into the individual, family, social, and global determinants that shape a community's health. Combining theory with practical application, Essentials of Global Community Health provides step-by-step guidance on interventions that promote health and prevent disease at the community level. With 16 structured case studies that span the globe—from Cambodia and Chad, to Moldova, Israel, Spain, and others—Essentials of Global Community Health explains and illustrates how principles of Community-Oriented Primary Care (COPC) and Community-Oriented Public Health (COPH) work in diverse settings worldwide. Jaime and Rosa Gofin bring 40 years of academic and field experience to bear in this text by offering a complete framework for putting community health into practice. Essentials of Global Community Health features • A step-by-step framework for integrating individual care and public health • A comprehensive resource on COPC and COPH • Illustrative examples and summary tables, plus study and review questions to reinforce concepts • A complete package of instructor and interactive student resources available online. Looking for more real-life evidence? Check out Cases 3, 7, 13, 17, & 20 in Essential Case Studies in Public Health, Putting Public Health into Practice.
