## THE FINANCIAL CRISIS OF OUR TIME

---

**Oxford University Press** In 2006 residential real estate prices peaked and started to fall, then threatened the world's financial institutions in 2007, and confronted the global economy with disaster in 2008. In the past few years, millions of people have lost very substantial portions of their wealth. And while the markets have rebounded considerably, they are still far from a full recovery. Now, professional economists, policy experts, public intellectuals, and the public at large are all struggling to understand the crisis that has engulfed us. In *The Financial Crisis of Our Time*, Robert W. Kolb provides an essential, comprehensive review of the context within which these events unfolded, arguing that while the crisis had no single cause, housing finance played a central role, and that to understand what happened, one must comprehend the mechanism by which the housing industry came into crisis. Kolb offers a history of the housing finance system as it developed throughout the twentieth century, and especially in the period from 1990 to 2006, showing how the originate-to-distribute model of mortgage financing presented market participants with a "clockwork of perverse incentives." In this system, various participants—simply by pursuing their narrow personal interests—participated in an elaborate mechanism that led to disaster. The book then gives a narrative of the crisis as it developed and analyzes all of the participants in the housing market, from the home buyers to investors in collateralized debt obligations (CDOs). At each step, the book explains in a nontechnical manner the essential relationships among the market participants and zeroes in on the incentives facing each party. The book also includes an extensive glossary and a detailed, authoritative timeline of the subprime financial crisis. Offering a unique look at the participants and incentives within the housing finance industry and its role in the biggest financial catastrophe in recent history, Robert W. Kolb provides one of the most comprehensive and illuminating accounts of the events that will be studied for decades to come as the financial crisis of our time.

## LAPAROSCOPIC LIVER, PANCREAS, AND BILIARY SURGERY

---

**John Wiley & Sons** *Laparoscopic Liver, Pancreas and Biliary Surgery: Textbook and Illustrated Video Atlas* is the perfect learning tool for all surgeons managing patients requiring advanced liver, pancreas and biliary surgery minimally invasively. This highly immersive text and video atlas will provide surgeons from trainee to advanced levels of practice, including, general surgeons, hepato-pancreato-biliary surgeons, transplant surgeons and surgical oncologists, with a step-by-step, multi-media teaching atlas on performing laparoscopic liver surgery, anatomically correct, safely and effectively. The atlas will teach the surgeons to perform anatomic liver resections of each liver segment expertly and logically, and will cover lobectomies, extended resections, advanced laparoscopic pancreas surgery (including Whipple) and other procedures. A special emphasis is placed on reproducibility of excellence in surgical technique. Each video will be supported by outstanding illustrations for each technique and 3D renderings of the relevant anatomy. The educational step-by-step high-definition videos teach everything you need to know, including critical aspects like patient positioning, port placement, dissection and much more. Led by the pioneers in laparoscopic liver, pancreas and biliary surgery, Brice Gayet and Claudius Conrad, the textbook-chapters will be authored by world experts and will contain surgical tips and tricks garnered from their unique experiences, to improve care, management of complications, relevant society guidelines and excellence in oncologic care for patients with hepato-pancreato-biliary cancers.

### SCALABLE VIDEO ON DEMAND

---

### ADAPTIVE INTERNET-BASED DISTRIBUTION

---

**John Wiley & Sons** *In recent years, the proliferation of available video content and the popularity of the Internet have encouraged service providers to develop new ways of distributing content to clients. Increasing video scaling ratios and advanced digital signal processing techniques have led to Internet Video-on-Demand applications, but these currently lack efficiency and quality. Scalable Video on Demand: Adaptive Internet-based Distribution examines how current video compression and streaming can be used to deliver high-quality applications over the Internet. In addition to analysing the problems of client heterogeneity and the absence of Quality of Service in the Internet, this book: assesses existing products and encoding formats; presents new algorithms and protocols for optimised on-line video streaming architectures; includes real-world application examples and experiments; sets out a practical 'toolkit' for Dynamically Reconfigurable Multimedia Distribution Systems. Written by an expert in the field of video distribution, Scalable Video on Demand: Adaptive Internet-based Distribution provides a novel approach to the design and implementation of Video-on-Demand systems for Software Engineers and researchers. It will also be useful for graduate students following Electronic Engineering and Computer Science courses.*

## FUNDAMENTALS OF FLUVIAL GEOMORPHOLOGY

---

**Routledge** *Rivers are significant geomorphological agents, they show an amazing diversity of form and behaviour and transfer water and sediment from the land surface to the oceans. This book examines how river systems respond to environmental change and why this understanding is needed for successful river management. Highly dynamic in nature, river channels adjust and evolve over timescales that range from hours to tens of thousands of years or more, and are found in a wide range of environments. This book provides a comprehensive overview of recent developments in river channel management, clearly illustrating why an understanding of fluvial geomorphology is vital in channel preservation, environmentally sensitive design and the restoration of degraded river channels. It covers: flow and sediment regimes: flow generation; flow regimes; sediment sources, transfer and yield channel processes: flow characteristics; processes of erosion and sediment transport; interactions between flow and the channel boundary; deposition channel form and behaviour: controls on channel form; channel adjustments; floodplain development; form and behaviour of alluvial and bedrock channels response to change: how channels have responded to past environmental change; impacts of human activity; reconstructing past changes river management: the fluvial hydrosystem; environmental degradation; environmentally sensitive engineering techniques; river restoration; the role of the fluvial geomorphologist. Fundamentals of Fluvial Geomorphology is an indispensable text for undergraduate students. It provides straightforward explanations for important concepts and mathematical formulae, backed up with conceptual diagrams and appropriate examples from around the world to show what they actually mean and*

why they are important. A colour plate section also shows spectacular examples of fluvial diversity.
