### **'LIKE PRODUCTS' IN INTERNATIONAL TRADE LAW**

---

---

### **TOWARDS A CONSISTENT GATT/WTO JURISPRUDENCE**

---

Oxford University Press on Demand The obligations of international trade law hinge upon the question of what constitute "like products". Trade disputes will often involve an examination of whether the products in question are in competition with one another. The most common term used for this test is to ask whether they are "like products" - that is to ask whether products are sufficiently similar for consumers to see them as substitutable - and thus whether they are subject to the rules of the WTO and GATT. The central thesis of this book is that despite the centrality of the principle of 'like products' to the WTO, it has not been consistently interpreted, and therefore the risk of discriminatory practice remains. The author, through analyzing legal and economic arguments, sets about defining the concept of 'like products' in such a way as to consistently give effect to WTO aims.

---

**GM WORLDWIDE REVIEW, NORTH AMERICAN SPECIFICATIONS AND EXECUTIVE LISTINGS**

---

FriesenPress Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

**PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS**

---

---

**THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT**

---

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
