NOT FADE AWAY

A MEMOIR OF SENSES LOST AND FOUND

Penguin Even a darkening world can be brilliantly lit from within. Born with a rare genetic mutation called Usher Syndrome type III, Rebecca Alexander has been simultaneously losing both her sight and hearing since she was a child, and was told that she would likely be completely blind and deaf by age 30. Then, at 18, a fall from a window left her athletic body completely shattered. None of us know what we would do in the face of such devastation. What Rebecca did was rise to every challenge she faced. She was losing her vision and hearing and her body was broken, but she refused to lose her drive, her zest for life and - maybe most importantly - her sense of humor. Now, at 35, with only a sliver of sight and significantly deteriorated hearing, she is a psychotherapist with two masters' degrees from Columbia University, and an athlete who teaches spin classes and regularly competes in extreme endurance races. She greets every day as if it were a gift, with boundless energy, innate curiosity, and a strength of spirit that have led her to places we can't imagine. In *Not Fade Away*, Rebecca tells her extraordinary story, by turns harrowing, funny and inspiring. She meditates on what she's lost—from the sound of a whisper to seeing a sky full of stars, and what she's found in return—an exquisite sense of intimacy with those she is closest to, a love of silence, a profound gratitude for everything she still has, and a joy in simple pleasures that most of us forget to notice. *Not Fade Away* is both a memoir of the senses and a unique look at the obstacles we all face—physical, psychological, and philosophical—exploring the extraordinary powers of memory, love, and perseverance. It is a gripping story, an offering of hope and motivation, and an exquisite reminder to live each day to its fullest.

INTELLIGENT PROJECTS USING PYTHON

9 REAL-WORLD AI PROJECTS LEVERAGING MACHINE LEARNING AND DEEP LEARNING WITH TENSORFLOW AND KERAS

[Packt Publishing Ltd](#) **Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python** **Key Features** A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications **Book Description** This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build

autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn Build an intelligent machine translation system using seq-2-seq neural translation machines Create AI applications using GAN and deploy smart mobile apps using TensorFlow Translate videos into text using CNN and RNN Implement smart AI Chatbots, and integrate and extend them in several domains Create smart reinforcement, learning-based applications using Q-Learning Break and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

FIREBALL

CAROLE LOMBARD AND THE MYSTERY OF FLIGHT 3

Paladin Communications This fresh look at Hollywood's "Queen of Screwball," Carole Lombard, presents a first-ever examination of the events that led to the shocking flight mishap that took her life on the side of a Nevada mountain in 1942. It also provides a day-by-day account of the struggles of Lombard's husband, Clark Gable, and other family, friends, and fans to cope with the tragedy. In effect, having just completed the first sale of war bonds and stamps in the nation following its entry into World War II, Lombard became the first Hollywood star to sacrifice her life in the War. The War Department offered Gable a funeral service with full military honors, but he refused it, knowing that his wife would not approve of such spectacle. Based on extensive research rather than gossip, this investigation further explores the lives of the 21 others on the plane, including 15 members of the U.S. Army Air Corps, and addresses one of the most enduring mysteries of World War II. On a clear night full of stars, with TWA's most experienced pilot at the controls of a 10-month-old aircraft under the power of two fully functioning engines, why did the flight crash into that Nevada mountainside? This gripping page-turner presents the story of the people on the plane, the friends and families left behind, and the heroic first responders who struggled up a mountain hoping to perform a miracle rescue. It is a story of accomplishment, bravery, sacrifice, and loss.

UNLANGUAGE

Eraserhead Press From Michael Cisco, one of the most innovative and subversive writers working today, comes the long-awaited, ground-breaking novel of a suicide survivor trying in vain to write himself back into existence. Unlanguage is the story of a man transformed by death and by language change. The language, once understood, transforms him, and transforms learning itself. One day, he looks down at the hand resting on his thigh and sees that it's just an ordinary hand. What had been composed of colored light made solid goes back to being meat and blood. His body reverts to the ordinary sloshing heaviness of a regular body. The exalted vision of his eyes becomes the filmy, blurred vision of the usual kind. He slumps back into his former self. Whirlwinds of shame close on him. With a violent, monkey-like energy he wracks his brains for a way back. Then it occurs to him, he can still write that language. He must write his way back. Told as a structural guide to impossible grammar, Michael Cisco's Unlanguage is a brilliant, thought-provoking novel that not only pushes the boundaries of literature but of language itself.

DESIGN FOR LIVING

A&C Black 'The actual facts are so simple. I love you. You love me. You love Otto. I love Otto. Otto loves you. Otto loves me. There now! Start to unravel from there.' Design for Living is a wickedly witty dark romantic comedy by Noel Coward. Initially banned in the UK, this provocative play portrays three amoral, glib and stylish characters and their hopelessly inescapable, if also unconventional, emotional entanglement. From 1930s bohemian Paris to the dizzying heights of Manhattan society, a tempestuous love triangle unravels between a vivacious interior designer, Gilda, playwright Leo and artist Otto - three people unashamedly and passionately in love with each other. They are trapped in what Coward called 'a three-sided erotic hodge podge.' With Coward's trademark piquant style, this lively, funny but also atypical play looks at dazzling, egotistical creatures and their self-destructive dependence on each other. Exploring themes of bisexuality, celebrity, success and self-obsession, Design for Living is a stylish and scandalous comedy.

AND THE BAND PLAYED ON

POLITICS, PEOPLE, AND THE AIDS EPIDEMIC

Souvenir Press **In 1981, the year when AIDS came to international attention, Randy Shilts was employed by the San Francisco Chronicle as the first openly gay journalist dealing with gay issues. He quickly devoted himself to reporting on the developing epidemic, trying to understand the cultural, medical and political impact of the disease on the gay community and United States society as a whole. Extensively researched, weaving together personal stories with political and social reporting, And the Band Played On is a masterpiece of investigative reporting that led to Randy Shilts being described as "the pre-eminent chronicler of gay life" by The New York Times. Shilts exposed why AIDS was allowed to spread - while the medical and political authorities ignored (and even denied) the threat. It was awarded the Stonewall Book Award, became an international bestseller translated into 7 languages, and was made into a major movie in 1993 starring Richard Gere and Sir Ian McKellen. And the Band Played On is one of the great works of contemporary journalism, and provides the foundation for the continuing debate about the greatest medical epidemic faced in our time.**

WHEN WE HAVE SUFFICIENTLY TORTURED EACH OTHER

TWELVE VARIATIONS ON SAMUEL RICHARDSON'S PAMELA

Faber & Faber **Go on then: lock the doors and see what happens. Show me how much power you really have. When We Have Sufficiently Tortured Each Other breaks through the surface of contemporary debate to explore the messy, often violent nature of desire and the fluid, complicated roles that men and women play. Using Samuel Richardson's novel Pamela as a provocation, six characters act out a dangerous game of sexual domination and resistance. When We Have Sufficiently Tortured Each Other premiered at the National Theatre, London, in January 2019.**

COMING OUT CHRISTIAN IN THE ROMAN WORLD

HOW THE FOLLOWERS OF JESUS MADE A PLACE IN CAESAR'S EMPIRE

Bloomsbury Publishing USA The supposed collapse of Roman civilization is still lamented more than 1,500 years later-and intertwined with this idea is the notion that a fledgling religion, Christianity, went from a persecuted fringe movement to an irresistible force that toppled the empire. The "intolerant zeal" of Christians, wrote Edward Gibbon, swept Rome's old gods away, and with them the structures that sustained Roman society. Not so, argues Douglas Boin. Such tales are simply untrue to history, and ignore the most important fact of all: life in Rome never came to a dramatic

stop. Instead, as Boin shows, a small minority movement rose to transform society-politically, religiously, and culturally-but it was a gradual process, one that happened in fits and starts over centuries. Drawing upon a decade of recent studies in history and archaeology, and on his own research, Boin opens up a wholly new window onto a period we thought we knew. His work is the first to describe how Christians navigated the complex world of social identity in terms of “passing” and “coming out.” Many Christians lived in a dynamic middle ground. Their quiet success, as much as the clamor of martyrdom, was a powerful agent for change. With this insightful approach to the story of Christians in the Roman world, Douglas Boin rewrites, and rediscovers, the fascinating early history of a world faith.
