A Blueprint for Japanese Victory in the Pacific: 1941-1942

Page Publishing, Inc An epic achievement over one hundred years in the making... In December 1941, Japan had perhaps the greatest combination of land, sea, and air forces the world had ever seen, and she used these to conquer a huge empire in the Western Pacific and East Asia. Yet by August 1945, Japan had been beaten to her knees by the combined power of China, Great Britain, and the United States. Was this destruction inevitable? Did Japan have no chance to defeat America and her allies? Why would she think she could successfully battle the two greatest industrial powers the world had ever known—Great Britain and the United States—at the same time? Violet Lightning: A Blueprint for Japanese Victory in the Pacific, 1941-1942 is a sweeping narrative over a century in the making. From the first confrontation in 1895 between the United States and Japan over Hawaii; to the massive Japanese defeats at Midway and Guadalcanal in 1942; to author John Eric Vining's first interest in the Japanese-American conflict in the fall of 1967 by reading Carrier War in the Pacific; to the fall of 1995 when Vining first put pen to paper on this project; and finally, to 2020's finished product by Page Publishing, Vining reviews a history of the acrimony between Japan and the United States in the first half of the Twentieth Century. He then builds what one reviewer calls a "chillingly believable" scenario for a Japanese victory in the greatest of all wars. Violet Lightning poses and answers the question: "Could Japan really have pulled it off?" You just might find yourself coming around to a point of view you didn't believe was possible.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science,

to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

the art of war

Lulu.com an ancient military treatise by Sun Tzu on warfare, statesmanship thinking and tactical methods, business tactics, countertactics, negotiation, dialogue, cooperation plans, approach strategies, diplomacy, and diplomatic manoeuvres **The Art of War** is an ancient Chinese military treatise attributed to Sun Tzu a high-ranking military general, strategist and tactician, and it was believed to have been compiled during the late Spring and Autumn period or early Warring States period. The text is composed of 13 chapters, each of which is devoted to one aspect of warfare. It is commonly known to be the definitive work on military strategy and tactics of its time. It has been the most famous and influential of China's Seven Military Classics, and for the last two thousand years it

Code of Practice

Mental Health Act 1983

The Stationery Office This **Code of Practice** is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.

Collective Memory

France and the Algerian War (1954-1962)

Lexington Books **Collective Memory** examines contemporary transmission of memories in France of the Algerian war of independence (1954-62). The work emphasizes the lack of transmission of memories of this war through a detailed case study of three crucial vectors of memory: school history, the media, and the family; and argues that lack of transmission of memories is feeding into contemporary racism in France.

Aesthetic Materialism

Electricity and American Romanticism

Stanford University Press **Aesthetic Materialism: Electricity and American Romanticism** focuses on American romantic writers' attempts to theorize aesthetic experience through the language of electricity. In response to scientific and technological developments, most notably the telegraph, eighteenth- and nineteenth-century electrical imagery reflected the mysterious workings of the physical mind as well as the uncertain, sometimes shocking connections between individuals. Writers such as Whitman, Melville, and Douglass drew on

images of electricity and telegraphy to describe literature both as the product of specific economic and social conditions and as a means of transcending the individual determined by such conditions. Aesthetic Materialism moves between historical and cultural analysis and close textual reading, challenging readers to see American literature as at once formal and historical and as a product of both aesthetic and material experience.

Developing Air Power for the United States Air Force During the First Century of Powered Flight

Department of the Air Force This volume explores the nature of civil war in the modern world and in historical perspective. Civil wars represent the principal form of armed conflict since the end of the Second World War, and certainly in the contemporary era. The nature and impact of civil wars suggests that these conflicts reflect and are also a driving force for major societal change. In this sense, "Understanding Civil War: Continuity and Change in Intrastate Conflict" argues that the nature of civil war is not fundamentally changing in nature. The book includes a thorough consideration of patterns and types of intrastate conflict and debates relating to the causes, impact, and changing nature of war. A key focus is on the political and social driving forces of such conflict and its societal meanings, significance and consequences. The author also explores methodological and epistemological challenges related to studying and understanding intrastate war. A range of questions and debates are addressed. What is the current knowledge regarding the causes and nature of armed intrastate conflict? Is it possible to produce general, cross-national theories on civil war which have broad explanatory relevance? Is the concept of civil wars empirically meaningful in an era of globalization and transnational war? Has intrastate conflict fundamentally changed in nature? Are there historical patterns in different types of intrastate conflict? What are the most interesting methodological trends and debates in the study of armed intrastate conflict? How are narratives about the causes and nature of civil wars constructed around ideas such as ethnic conflict, separatist conflict and resource conflict? This book will be of much interest to students of civil wars, intrastate conflict, security studies and IR in general.

The Midwest Goes to War

The 32nd Division in the Great War

The 32nd Division was a National Guard unit composed of volunteers from Michigan and Wisconsin. *The Midwest Goes to War* tells the story of the 32nd and its participation during the Great War in France. Following the formation, training, and deployment of the 32nd, the book gives a chronological account of the mobilization, transport, assumption of combat responsibilities, resumption of the offense that led to the eventual defeat of Germany, and the division's time spent in Germany as an occupation force. The Division fought in the major campaigns of 1918 and sustained many losses, yet always accomplished its mission. Numerous individual heroic exploits are examined as well as the tactical and strategic contributions of the 32nd. Based on numerous personal accounts, diaries, and period publications, as well as recent works and extensive archival research, this book examines the influx of new units and personnel; it demonstrates the resumption of the mobile offensive, rejection of static defense, and celebrates the victories of the citizen soldier.
