There, generations of Tibetan monks have passed down a series of exercises with mystical, age-reversing properties. Youth Studies and Generations

Values, Practices and Discourses on Generations

MDPI There is currently much discourse about generations in the public sphere. A sequence of letters conflates generations and age cohorts born in the last few decades (generation “X”, “Y” or “Z”) as well as multiple categories are used to describe today’s young people as a generation that is distinct from its predecessors. Despite the popularity of generational labels in media, politics, or even academia, the use of generation as a conceptual tool in youth studies has been controversial. This Special Issue allows readers to better understand the key issues regarding the use of generation as a theoretical concept and/or as a social category in the field of youth studies, shedding light on the controversies, trends, and cautions that go through it.

Needles in haystacks

Finding a way forward for cross-sectoral youth policy

Council of Europe (Young) **lives are cross-sectoral by nature, and youth policy also needs to be so. Cross-sectorality is a well-known aspect of youth policy, but the importance of this aspect does not translate into a common understanding of what cross-sectoral youth policy means and of the ways it can be developed. This book is a collection of articles detailing concrete experiences of cross-sectoral youth policy implementation. It starts with the idea that the efficacy and the sustainability of cross-sectoral youth policy depends on the degree and nature of interaction between various youth policy subdomains and levels, ranging from legal frameworks to interinstitutional or interpersonal relations, and from pan-European to local level. By making these examples available, this book will hopefully support the development of a common understanding of what cross-sectoral youth policy means in different countries and settings. The authors themselves reflect the diversity of the people involved in youth policy (policy makers, youth researchers, youth workers and workers in the field of youth) and this work represents their intention to provide these professionals - as well as others interested in the youth field - with the knowledge necessary to implement, in a real-life scenario, cross-sectoral youth policy.**

Youth Unemployment

GRIN Verlag Seminar paper from the year 2006 in the subject Economics - Job market economics, grade: 1,7, Goteborg University, 23 entries in the bibliography, language: English, abstract: With four to seventeen percent unemployment rates, unemployment has become one of the most discussed topics in Europe. With a continued decrease in the number of people hired each year, this problem gains a special importance for young people. In 2004, within the European Union, more than 18,6 % people under the age of 25 were without a job. This is why during the election campaigns in 2005, in Germany, according to the electors the party's labour market policy was the most important subject for their decision. One reason for the long-lasting violent demonstrations in French suburbs last autumn was the inequitable chances for young people from these areas to get a job. Especially for young people, a hesitant and hard beginning in their professional life means a lack in their CV, which can become a big obstacle for later jobs and for their whole career. Furthermore, the first job is often seen as a way of finding identification. A bad start and several rejections can influence the motivation to work and the working performance of young people."

Youth worker education in Europe

Policies, structures, practices

Council of Europe Youth work, coupled with effective government policies, is invaluable in ensuring that young people are given the opportunity to acquire the knowledge, skills and attitudes they need for civic engagement and social action. Youth work is experiencing a policy momentum at European level. Since the adoption of a resolution on the subject by the Committee of Ministers of the Council of Europe in 2017, youth work is back on the core agenda of the Council of Europe and the European Union youth strategies. This book looks at how youth work practitioners learn their trade, what formal and non-formal education offers exist and how education is contextualised in the broader picture of youth work recognition. Starting with the premise that formal education entails a series of steps from which youth work practitioners would benefit, this book explores that picture through a mapping study and delves further into its findings through thematic contributions. The results of the research and debates with policy makers, researchers,

practitioners, educators and other stakeholders identifies a field of growing opportunities across Europe. The situation of youth workers in different countries varies from advanced practice architectures for youth worker education to those in need of development. Youth worker education, however, is not only about the education and training offers, it is also about financial and organisational resources, legislation, support systems, competence frameworks, quality standards, ethical frameworks and guidance. This book aims to support youth work so that it becomes more visible and evolves into a recognised field of practice among other occupations and professions engaging with young people.

Powers, inequalities and vulnerabilities

Impact of globalisation on children, youth and families and on the mission of the church

AOSIS This research addresses the gap that is present in both missiology and family and youth ministry. Missiology does not focus on children and youth specifically, while this is the largest population in the developing world. On the other hand, family and youth ministry has a more pastoral than missional approach, not always taking cognisance of contexts like globalisation. Thus, the purpose of the book is to address the sometimes unintended and unnoticed influence of globalisation on the mission of the church, with a specific focus on children, youth and family. For this purpose, the International Association for Mission Studies study group for children, youth and families coming from different parts of the world decided to describe the powers, inequalities and vulnerabilities of children, youth and families in a globalised world from their specific contexts. Although the most prominent research methodology was

critical literature studies, methods like autoethnographic, and empirical methods were also used. No decisions were made on a specific method of research for this publication. This publication can be viewed as an interdisciplinary and intra-disciplinary, because it deals with social sciences, anthropology, psychology, missiology, systematic theology and practical theology.

Hitler Youth

Harvard University Press In modern times, the recruitment of children into a political organization and ideology reached its boldest embodiment in the Hitler Youth, founded in 1933 soon after the Nazi Party assumed power in Germany. Determining that by age ten children's minds could be turned from play to politics, the regime inducted nearly all German juveniles between the ages of ten and eighteen into its state-run organization. The result was a potent tool for bending young minds and hearts to the will of Adolf Hitler. Baldur von Schirach headed a strict chain of command whose goal was to shift the adolescents' sense of obedience from home and school to the racially defined Volk and the Third Reich. Luring boys and girls into Hitler Youth ranks by offering them status, uniforms, and weekend hikes, the Nazis turned campgrounds into premilitary training sites, air guns into machine guns, sing-alongs into marching drills, instruction into indoctrination, and children into Nazis. A few resisted for personal or political reasons, but the overwhelming majority enlisted. Drawing on original reports, letters, diaries, and memoirs, Michael H. Kater traces the history of the Hitler Youth, examining the means, degree, and impact of conversion, and the subsequent fate of young recruits. Millions of Hitler Youth joined the armed forces; thousands gleefully participated in the subjugation of foreign peoples and the obliteration of "racial aliens." Although young, they committed crimes against humanity for which they cannot escape judgment. Their story stands as a harsh reminder of the moral bankruptcy of regimes that make children complicit in crimes of the state.

Rethinking Youth

Routledge Young people grow up in varied circumstances with different priorities and perspectives. While youth does not exist as a single group we need to understand what is happening in young people's lives. *Rethinking Youth* challenges the conventional wisdoms surrounding the position and opportunities of young people today and provides a systematic overview of the major perspectives in youth studies. The authors demonstrate how the concept of youth involves a tension between the social significance of age, which gives young people a common status, and the

significance of social divisions. Drawing upon studies from different societies, they examine debates surrounding youth and economy, youth development, youth subcultures, youth transitions and youth marginalisation. *Rethinking Youth* offers a provocative critique of mainstream conceptions of youth, the programs and strategies designed for 'at risk' young people, and policy development in youth affairs. It calls for greater sensitivity to the complexities of youth, and greater emphasis on democracy and equality in dealing with the problems experienced by young people in a rapidly changing world. Johanna Wyn is Director of the Youth Research Centre at the University of Melbourne. Rob White lectures in Criminology at the University of Melbourne.

Youth and the Crisis

Unemployment, education and health in Europe

Routledge The recent recession has led to an ongoing crisis in the youth labour market in Europe. This timely book deals with a number of areas related to the context, choices and experiences of young people, the consequences of which resonate throughout their lives. The focus of the contributions to this volume is on issues which, whilst undoubtedly important, have thus far received less attention than they arguably deserve. The first part of the book is concerned with issues related to education and training, covering matters such as the role of monopsony in training, the consequences of over-education, and the quality of educational institutions from primary to tertiary. The second part is primarily concerned with the long-term consequences of short-term choices and experiences including contributions on health-related choices, health consequences later in life, factors affecting the home-leaving decision, as well as an analysis of the increasing intergenerational transmission of inequality; a trend which accelerated during the recession. The last part of the book deals with issues related to youth unemployment and NEET - the direct consequence of the

recession. This book contains a number of innovative analyses reporting significant findings that contrast with standard models. Some of the more interesting results directly contradict conventional wisdom on a number of topics from the importance of monopsony in training markets to the importance of transitory income changes on consumption of addictive goods. This book is suitable for those who study labor economics, political economy as well as employment and unemployment.

Youth and Internet Pornography

The Impact and Influence on Adolescent Development

Adolescence and Society This much-needed book provides an in-depth, nonjudgmental look at how consumption of Internet pornography and sexually explicit Internet material (SEIM) impacts the social, physical, emotional, and sexual development of adolescents. *Youth and Internet Pornography* explores some of the most contemporary issues in this field, including deepfake technology, the long-standing conflict between legal challenges to pornography versus individual rights, and the interrelationship between adolescent use of Internet pornography and the larger culture. The text outlines how different generations interact with the Internet, as well as the related legal and ethical issues around working with these different age groups. Behun and Owens use clinical illustrations and guided practice exercises to contextualise theoretical constructs and research, providing a comprehensive guide to how those working with young people should consider the impact of Internet pornography in their day-to-day practice. This book is essential reading for professionals and policy makers hoping to mitigate outcomes in counselling, youth and social work, and education, as well as supplementary reading for courses in human sexuality and development.
