14 Nurturing Mental Health with Wellbeing Apps for Young People

Student wellbeing is a crucial part of many schools' curricula as incidents of anxiety, stress and depression are having a widespread impact and suggesting a mental health crisis at all levels of education. We explore ways of supporting students to navigate this difficult territory with the latest offering of wellbeing apps.

28 Getting Started with Social Media in the Classroom

How are students going to learn to use social media effectively if they don't get shown how? Shawn McCusker offers several tips and ideas for making it a part of the modern teaching arsenal.

36 Improving Access and Inclusivity One Step at a Time

In this interview, Chris Rothwell from Microsoft Education shares his thoughts on what successful schools are doing to implement technology and talks about Microsoft's new directions in the edtech arena.

46 Riding the Light – Improving Bandwidth with LiFi

A school in Scotland has piloted some new technology that provides internet connectivity through lighting. Professor Harald Haas explains what he has termed 'LiFi' and how it is transforming the digital realm.

64 Starting Out With Grid Algebra in KS1

Maths technology for young people often focuses on drills and repetition. Alison Parish shows us how the Grid Algebra software developed by the Association of Teachers of Mathematics can help students visualise maths concepts and challenge themselves to make higher level connections.

73 Active Music Making in the Special Needs Classroom

Making music is a powerful experience that is often not available to students with physical difficulties. Carrie Lennard shares how her Improvise Approach is making both technology and music available to students with all levels of disability.

80 Adapting to AI in Education – Critical Questions for Educators

Artificial and adaptive intelligence is transforming education in powerful and dramatic ways, but do we really know what we're dealing with? Harbir Kaur looks at the current state of affairs and suggests some areas that might be worth some vigilance.

92 New on the Scene

Wondering about the latest tools and products? Our editor rounds up some of the latest offerings in this regular feature.

96 Enhancing Child Development Instead of Replacing It

Lowell Monke explores three largely ignored issues that arise from the ongoing human-technology relationship that children and educators are faced with.
